Certification

Manufacturer: Larson Electronics LLC
Address: 9419 US-HWY 175
Kemp, Texas 75143

Declare the following equipment conforms to the standard(s) as listed:

Model: IND-AH Series
Description: UV Light Machines and Light Fixtures

Evaluated Listings:

ETL: NEC / United States standards
ETL: CEC / Canada standards
ETL: Modifications under UL 508A – NEC / United States standards
ETL: Modifications under CSA C22.2 No. 14 – CEC / Canadian standards

The IND Series UV Light Machines and UV Light Fixtures are certified to UL 508A and CSA C22.2 No 14 for industrial controls. Larson Electronics LLC is a certified “panel shop” and is certified for our engineering and manufacturing processes. The IND-AH unit may include timer switches, infrared (PIR) or microwave motion/occupancy sensors, schedule controls, wireless remote control functionality, fans, fan speed controls, programmable functionality, or other control features.

Each unit is built to NEC and CEC electrical code. All electrical components used in the IND product line are certified to National Electric Code (NEC) for United States and Canadian Electric Code (CEC) for Canada. This includes all ballasts, sockets, tombstones, internal wiring, external wiring, buttons, relays, cord caps, and wire terminations. This is a requirement for our panel shop certification. Instead of certifying each part number, our shop is certified for our processes. This allows us to manufacture custom systems without the time delays associated with certifying each part number. Our shop undergoes regular audits for panel shop processes.

Each unit is inspected by our quality control department before shipment. Larson Electronics is an ISO 9001:2015 certified shop for quality control. Our shop undergoes regular audits for quality control processes.
