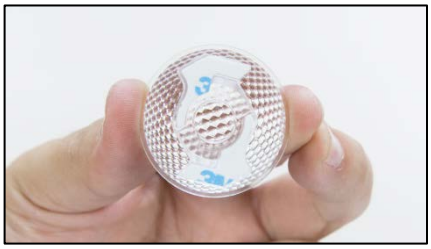
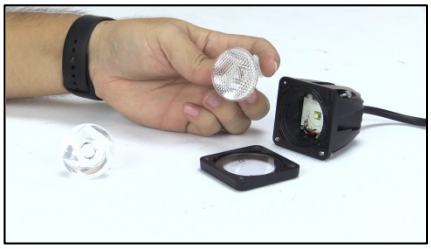
LEDLB-1 SERIES LENS REPLACEMENT

1. To replace the lens on an LEDLB-1 series light, use the *included allen wrench (2.5mm) and remove the 4 allen bolts on the back to remove the bezel.

   * ALLEN WRENCH INCLUDED WITH MOST LEDLB-1 SERIES MOUNTING HARDWARE

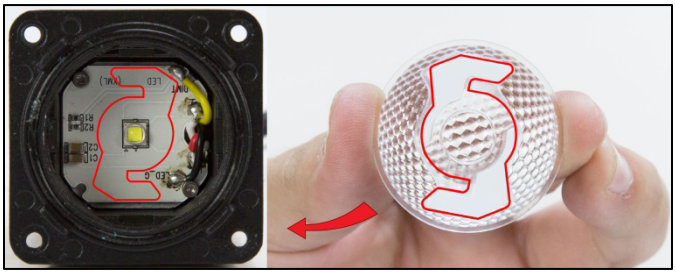


2. Each lens has double-sided tape on the bottom holding it in place.



3. Carefully remove the old lens.

4. Grab your replacement lens and peel the film off the back revealing the adhesive.



5. Place the new lens so the shape on the back matches the drawing on the LED board.

6. Replace the bezel and tighten the 4 allen bolts. Your new lens is now installed.
