Light towers offer the power and coverage of surface mounted lighting in a portable format for temporary applications. Larson Electronics continues to add more options to our range of portable light towers, including metal halide lighting, LED lighting and explosion proof lighting.

Our light towers are built for the most rugged conditions for mining, oil and gas, construction site and any other job site where high-powered temporary lighting is needed.

We also couple our light towers with generators and power distribution so location is never any issue to provide the ample light needed for the job. We keep an inventory of light towers for purchase and rent so availability is never an issue. We build custom light towers for our customers based on their specifications and all of our fabrication is on site for the highest in quality control.
