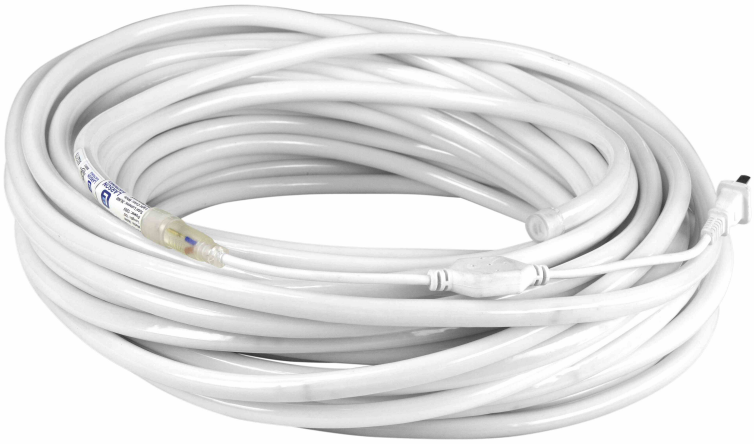
The WAL-RSL Series from Larson Electronics is a High Output Waterproof Rope Light that is high powered, extremely durable, and suitable for marine applications, including boat docks, ship yards and perimeter lighting systems, and for temporary lighting on construction sites and in work areas. The IP67 waterproof luminary is available in many length options and emits a cool white beam of 5000K.

OPERATION



WAL-RSL Series can be mounted in many different methods and locations, such as along ledges, behind flanges, or around posts and poles. These particulars are left to the end user. Be sure light is safe from hazards such as sharp edges or pinch points to protect from damage and maintain waterproof integrity. Connect plug to a compatible receptacle outputting the correct voltage as listed on product label. Light is instant-on and will illuminate upon receiving power. **Always check label for correct voltage. Connecting to incorrect voltage can result in damage to the fixture.** Always follow any applicable local or national electrical and/or building code when installing and using this light. Waterproof connections if in an area where unit may become wet.
