HID-22-15M-SL-REM

Metal Halide Light w/ Remote Ballast - 1500 Watt HID - Flood Beam - NEMA 3R Ballst Box

Product ID: 64303

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

The HID-22-15M-SL-REM 1500 Watt Metal Halide Light from Larson Electronics provides operators with the intensity and good color rendering of a metal halide lamp in a unit that is safe for ground mounting and use in wet areas. The unit comes standard with a remote ballast, this means that the HID unit can be mounted at a different location than it`s ballast via customer provided wiring. This particular unit comes with a short whip and quick disconnect between the ballast box and light. Additional wiring is available from Larson Electronics if needed. We also offer an alternate sku that comes with 30' of additional wiring in HID-22-15M-SL-REM-30.

The HID-22-15M-SL-REM 1500 watt metal halide light produces exceptional illumination using a 19” or 23" aluminum reflector housing that spreads a powerful flood pattern of high quality light over large areas. This fixture is equipped with a 1500 watt metal halide lamp which produces the intense illumination and good color rendering normally associated with these lamps. The metal halide lamp is secured within a separate die cast housing for strength and durability while a clear tempered glass lens provides protection for the lamp. The unit is standard with a remote ballast that can be mounted up to 6 inches from the HID unit (wired). U.L. wet area certification and the high power flood beam produced by this lamp makes it ideal for applications requiring illumination of large scale areas that may be subject to wet conditions.The reflector on this lamp is constructed of aluminum with a clear tempered glass lens which is hinged onto the reflector and secured into place with a four point latching system. The lamp socket is die cast aluminum and separate from the reflector for added durability. The reflector and lamp socket assembly are secured together as one unit which makes installation simple and straightforward. Vertical and horizontal aiming guides are included in this lamps design which makes aiming this lamp during operation easier and safer,

protecting users from the potential burns associated with handling operating metal halide lamp fixtures. A stainless steel hinge provides durable adjustability and corrosion resistance. This lamp comes prewired with a six foot cord and is U.L. rated for wet areas and ground mounting.

Suggested Applications: Stadiums, Speedways, Storage Areas, Public Parks, Mobile LightingSpecifications:
-Powder Coated for Corrosion Resistance
-Finger Latch for Easy Bulb Access
-19" or 23" tempered glass w/aluminum reflector
-1500 Watt Metal Halide Lamp
-Vertical and Horizontal Aim
-UL 1572
-Heavy Duty 6" Power Cord
-Die-Cast Aluminum Housing
