WPPH-NM-ALG-10K-227

Weatherproof Phone w/ Dial Pad - Analog - Non-metallic Housing - Noise Canceling - 6' Handset Cord

Product ID: 148235

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

WPPH-NM-ALG-10K-227 Weatherproof Telephone
Phone Type: Analog
Dimensions: 9.4"W x 13.2"H x 7.4"D
Weight: 8.2 lbs
Voltage: 24V DC - 60V DC
Minimum/Maximum Current: 20mA DC/60mA DC
Signaling: DTMF
Ringer Level: 91 dBA SPL (Door Open)
Materials: Glass-reinforced Polyester (Non-metallic)
Handset Cord: 6` Hytrel Cord (250 lbs Pull Capacity)
Operating Temperature: -40°C to +60°C
Mounting: Wall, Surface or Column via (4) Mounting Holes
Wiring: Line Powered
Wiring Hub: 1/2" Conduit Hub (Bottom)

Ratings/Approvals
NEMA 3R Enclosure
Braille Metallic Keypad
Hearing Aid Compatible
Noise Canceling
Volume Control Handset
Non-movable Hookswitch
Non-volatile Electronic Memory
Weatherproof

The WPPH-NM-ALG-10K-227 Weatherproof Analog Telephone from Larson Electronics is a heavy-duty communication device that is suitable for harsh and rugged environments. The unit supports noise-canceling and hearing aid compatible features for enhanced clarity during operation. A 6` Hytrel handset cord with 250 lbs pull-strength capacity ensures comprehensive reliability during emergency situations.

The WPPH-NM-ALG-10K-227 is designed to provide safe, reliable communication for both indoor and outdoor environments. This line-powered unit comes with a proximity detecting, non-movable hookswitch for extended reliability during operation. A ringer level of 91 dBA (with door open) ensures notification from far distances. The weatherproof telephone is ideal for use in rugged locations with a temperature range of -40°C to +60°C.

The industrial communication device features a braille metallic keypad with hearing aid compatibility for individuals with visual or auditory disabilities. For use in loud environments, operators may adjust the volume of the handset. Clarity on the other end of the line is achieved via the noise-canceling microphone inside the unit. Since this telephone is line powered, it will continue working even if the main power source faults or is disconnected (no internal battery required).

Durability: This unit is housed in a non-metallic, glass-reinforced polyester NEMA 3R enclosure. The weatherproof phone features a heavy-duty 6` Hytrel handset cord with a pull-strength capacity of 250 lbs. This component can retain its threshold in extreme temperatures and harsh environments. A sealed keypad helps deter the ingress of dust, dirt and moisture. The electronic ringer is also sealed, ensuring foreign contaminants will not enter the housing.

Mounting/Wiring: The WPPH-NM-ALG-10K-227 telephone is designed to be wall, surface or column mounted via four mounting holes found in the back of the unit. During installation, a 1/2" conduit entry located at the bottom of the device is available for completing wiring and line connections. To prevent the ingress of moisture, it is advisable to seal conduit entries using a silicone sealant (or equivalent).

Suggested Applications: Industrial facilities, outdoor communications, construction sites, public areas, plant entrances, parking garages, airports and more.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
