LARSON ELECTRONICS

Pad Mount Transformers
1 Phase

CATALOG 2023

Pad Mount Transformers - 1PH

Larson Electronics single-phase pad mount transformers are designed for power distribution in public, commercial and residential areas, construction projects and outdoor locations. The single-phase pad mount transformers in this catalog support power generation for a wide range of scenarios, including neighborhoods, apartment complexes, warehouses, manufacturing sites, commercial buildings or zones, public infrastructure, solar generation and industrial sites. For direct installation on concrete pads or flat surfaces, the transformers feature a removable base sill for sliding or skidding into the desired location or position. Each unit has tamperproof construction to ensure security and long-term use in outdoor areas. Installed without fencing, the systems offer space-saving, cost-effective benefits for businesses.

This catalog includes 5 kVA to 833 KVA single-phase pad mount transformers. Numerous single-phase primary and secondary voltage configurations are available for meeting specific power requirements, including Delta or Grounded Wye primary voltages. Transformers can be ordered with a five-position tap changer with +/- 2.5% taps for small changes in voltage.

ANSI Type I and ANSI Type II configurations are offered in this catalog. Usually for large pad mount transformers, units with subtractive polarity have the X1 terminal (on the left) directly across the H1 terminal. Small distribution models with additive polarity have the X1 terminal (on the right) diagonally across the H1 terminal.

Transformers with live front and dead front primary configurations are available for managing power connections. Live front bushings are equipped with a top-located spade and enable direct access to connections. Dead front bushings are insulated for arc flash protection and are “plug and play” connections using a load break or dead break elbow. Choose between radial feed and loop feed configurations to meet the power distribution requirements of specific sites or facilities.

Systems with a four-position load break switch offer enhanced controls for operators. The positions on the load break switch are: A side on + transformer on, B side on + transformer on, A and B sides + transformer on, and A and B sides + transformer off.

Transformers can be ordered with high elbow surge arrestors for over voltage and transient voltage protection. Systems without surge arrestors that have mounting provisions for customer-provided surge arrestors are also available in this catalog. Single-phase pad mount transformers can be ordered with bayonet protection fuses. Standard grounding components include NEMA 2-hole ground pads or ½” ground bosses.

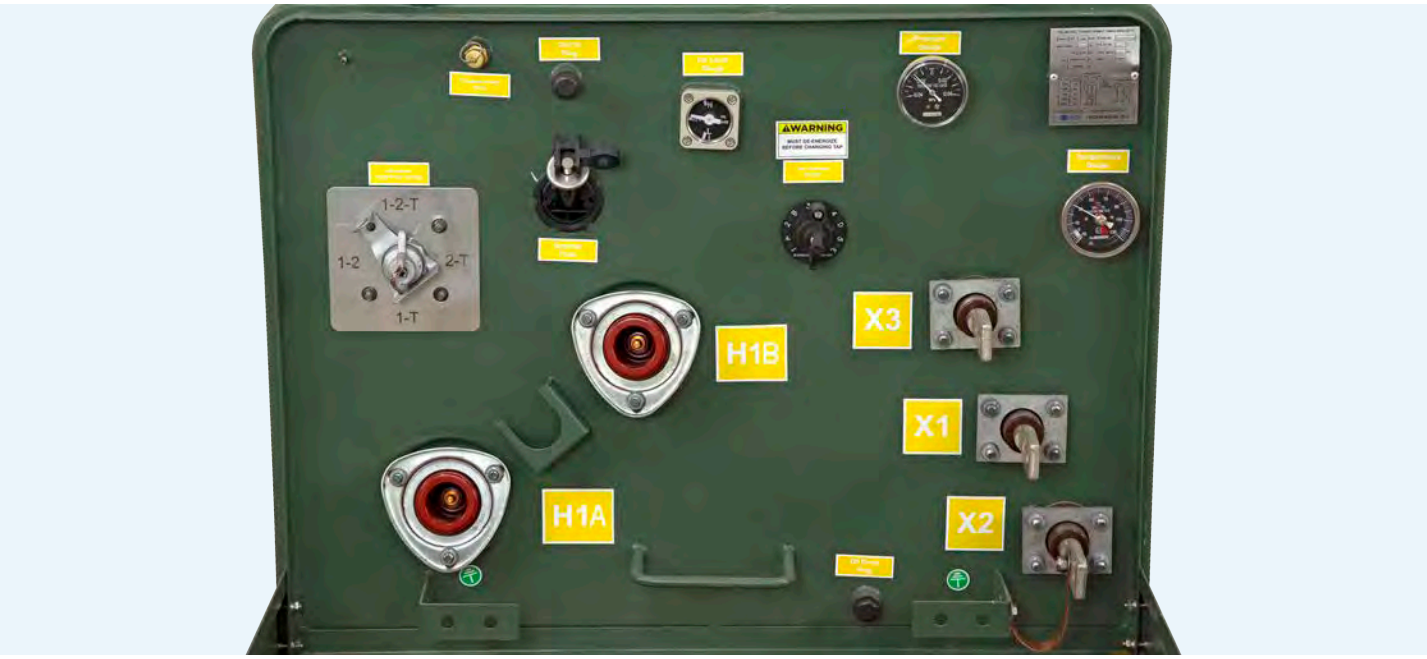

Larson Electronics pad mount transformers are offered with mineral oil, FR-3 oil or RAPO biodegradable (vegetable oil) insulation fluid. Biodegradable fluid (KNAN) features a higher heat capacity, flash point and fire point than mineral oil making this option safer. This non-toxic fluid can also sustain higher load conditions than other types of insulation fluid. Standard systems are air cooled and does not contain fans or mounting provisions for fans.

The transformers in this catalog can be ordered with aluminum or copper windings. Aluminum windings are low cost and feature lower eddy losses than copper windings. Copper windings are heavy-duty offer increased reliability during operation.

Models with liquid level, temperature and pressure/vacuum gauges are analog and can be used for monitoring. Gauges with auxiliary contacts are for monitoring using connected equipment. These pad mount transformers can come equipped with pressure relief valves, fill valves and drain valves with a sampler port. For enhanced safety and detection, systems can be ordered with rapid rise relays and fault pressure devices.

Larson Electronics single-phase pad mount

Pad Mount Transformers - 1PH

transformers conform to NEMA and ANSI C57.12 standards. Models that meet DOE 2016 efficiency standards are available in this catalog for compliance.

Internal components are accessible via a lift up front cover. Heavy-duty lifting lugs ensure safe transportation and installation. Materials for the housing include coated steel, 304 stainless steel or 429 stainless steel. Models with a stainless steel base sill and tank skirt are for additional corrosion resistance protection in areas with frequent exposure to ground water and moisture from the mounting platform.

A selection of cabinet types, housing materials and paint finishes are available to suit various project or site requirements. The paint finish for standard models is Munsell 7.0 GY 3.29/1.5 Bell Green. Other colors, such as grey, light blue, black and more, can be ordered through customization.

Larson Electronics is a leading manufacturer of industrial power distribution systems and transformers. In addition to single-phase pad mount transformers, the company offers large-scale power solutions for businesses, including substations, three-phase pad mount transformers, overhead pole mount transformers dry type transformers portable power distribution and more.

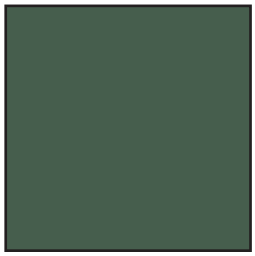

Standard Configurations:

- Loop feed primary configuration
- Dead front primary, live front secondary
- 5-250 KVA come equipped with 200A Load Break Elbows with Inserts
- 333-833 KVA come equipped with 600A Dead Break Elbows
- NEMA 4-Hole In-line Spade Secondary Terminals
- KNAN Cooling Class
- Biodegradable Natural Vegetable Ester Oil (NONPCB Fluid)
- Copper Windings
- 5-Position tap changer: (2) 2.5% above & (2) 2.5%below taps
- 4-Position Load Break Switch (LBOR)
- Analog Liquid Level Gauge
- Analog Temperature Gauge
- Analog Pressure/Vacuum Gauge
- Automatic Action Pressure Relief Device
- Fill Port
- Drain Port w/o Sampler Valve
- 65°C Temperature Rise over Ambient
- 40°C Ambient Temperature Rating
- 3300ft (1000 meter) elevation rating
- K-1 Harmonic Mitigation

Other configurations can be configured on request.

Pad Mount Transformers - Color Options

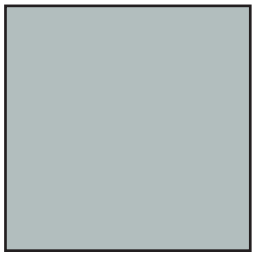

Larson Electronics LLC offers a variety of color selections for our pad mounted transformers. The standard color is Munsell™ 7GY 3.29/1.5 Pad-Mount Green. However we do offer additional color options. Please see below for the color choice selection of our primary choices. Additional custom options available upon request.

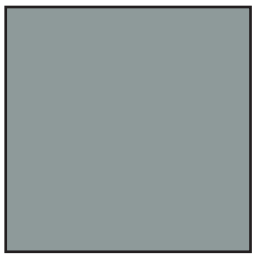

Munsell™ 7GY 3.29/1.5 Pad-Mount Green

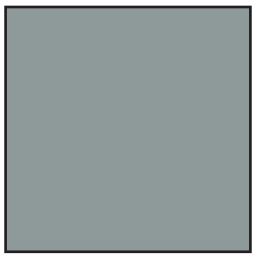

Munsell™ 9GY 1.5/2.6 Canadian Green

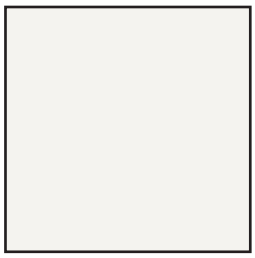

Munsell™ 5BG 7.0/0.4 Light Grey (ANSI #70)

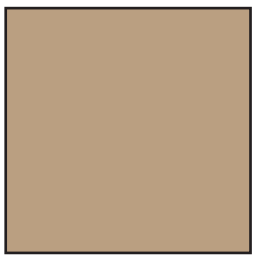

Munsell™ 10bg 6/1 Blue Grey

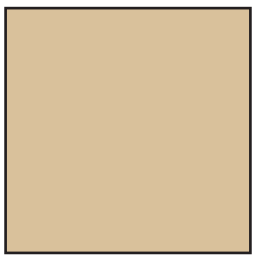

Munsell™ 10bg 6/1 Steel Blue

Munsell™ N 9/ Safety White

Federal Standard Desert Tan FS-595B-33446

Federal Standard Eagle Feather Tan FS-595-23578

Federal Standard Tobacco Brown FS-595C-30108
