XLE-MD-DC-8H-20FT-4X-R1

Portable UV-blocking Safety Pop-up Wall Divider - 400 sq. ft. Area - (4) 1.5" x 8'H x 20'W - Anodized Black

Product ID: 267858

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

XLE-MD-DC-8H-20FT-4X-R1 UV Safety Wall Divider

Unit Type: Portable UV-blocking Safety Wall

Wall Dimensions: 8'-H x 20'-W x 1.5"-D

Quantity: (4) Wall Kits

Weight: -

Area: 400 sq. ft.

The Larson Electronics XLE-MD-DC-8H-20FT-4X-R1 is a Portable UV-

blocking Safety Pop-up Wall Divider for setting up temporary UV sanitation areas that are segregated from ongoing, general activities in the room or facility. Four wall kits can be used to create a 400 sq ft. UV disinfection area. This kit comes with inherently flame resistant drapes, support bars, clamps, 8' uprights and slip-fit bases.

The XLE-MD-DC-8H-20FT-4X-R1 blocks harmful UV rays in occupied areas and busy facilities where UV sanitation is ongoing. Consisting of four wall kits, the dividers create a 400 sq. ft. pop-up, UV disinfection area that is segregated from other activities in the room or building. Each wall is supplied with two 94"-H x 120"-W drapes protected by a black flat matte finish. These inherently flame resistant, blackout curtains have 60% opacity and are secured by three 3-way universal clamps. Four metal drape support crossbars per wall, which have steel hook ends held into place with two rivets on each end, hold the curtains. The drapes are supported by 8' anodized black uprights (three per wall). CastleTop configuration ensures gapless drape walls, improves long-term durability and eliminates upright bumps.

This temporary UV safety wall divider solution is recommended for use with our 180° directional UV carts and 360° omni-directional UV carts.

Mount: Each wall is equipped with three 16" x 14" slip-fit bases that have stacking slots and 3-pin placement holes. Made out of powder coated 8-gauge galvanized steel (black), the components come with edge protectors for durability. The bases provide a stable foundation when the drapes are deployed in the area.

Suggested Applications: UV sanitation, industrial sites, manufacturing facilities, warehouses, parks, public sites, hospitals, medical and more.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
