WAL-SL-50-12.3-NL-MOD1

500ft Work Area Lighting String - Yellow 12/3 SJTW - Black Molded Sockets - NO LAMPS

Product ID: 149337

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

WAL-SL-50-12.3-NL-MOD1 String Lights

Lamp Type: Lamps Sold Separately
Total Watts:N/A
Voltage: 277V AC Mac
Total Length Per Unit: 500`
Wiring: 10` 12/3 SJTW Cable Per Unit, 5` Input Whip, 5` Output Whip
Cord Caps: L22-20P and L22-20C Twist Lock
Mounting: Hook Eyelet w/ S Hooks
Shipping Dimensions: 36" x 30" x 36"
Shipping Weight: 200 lbs

Features

Wet Area Approved
Works with LED Lamps
Daisy Chain Connection (End to End)
Spans total length of 500`
Certified for United States and Canada

The Larson Electronics WAL-SL-50-12.3-NL-MOD1 Work Area Lighting String Light is designed for temporary illumination and daisy chain connections across the job site. This work site light set accepts ten lamps up to 100 watts per lamp to provide high quality lighting where standard lighting is not available. Each socket is pad printed with PSNS SHOP 99.
Please Note: This is the string and molded sockets ONLY. Does NOT include the lamp, lamp cage or plugs/connectors.
This work area string light consists of ten molded lamp sockets and plastic guards with 10 feet of 12/3 SJTW cable between each unit, stretching a total of 500` in length. This temporary string light features a 5` input whip and 5` output whip

terminated in flying leads for customer provided connection. Each socket can be connected to an LED, compact fluorescent, or incandescent lamp up to 100 watts. Each lamp light screws into a molded E26 lamp socket pad printed with PSNS SHOP 99.

Multiple stringer sections can daisy chained together via 5` whips terminated in flying leads for customer provided connections, with a maximum of ten stringers daisy chained together when equipped with 10 watt 277V LED lamps. Alternating hots along between each daisy chained unit allows these string lights to be connected together, spanning over a mile in length. Previously, it would have been unrealistic to have a complete assembly reaching 500` in length from a single point of power.

Larson Electronics offers a wide variety of high output LED lamps and lighting solutions. Our A19 style LED lamps are a perfect fit for this string light set. The LED-A19-10-E26 directional 10 watt LED lamp provides down lighting to effectively illuminate the area below where the string light is mounted, whereas our omni-directional LED-A19-10-E26-SML 10 watt LED lamp provides the same light distribution as a standard 100 watt incandescent. Both LED lamps draw 1/10th the electricity as a standard 100 watt rough service lamp while providing 30% more light output, increased durability and reliability, and achieving a 50,000 hour lamp life.

This Work Area Lighting String Light is configured to operate with 120V-277VAC current and are available in an optional 11-25V AC/DC configuration as well. This Work Area Lighting String Light is suitable for wet areas, extremely long lived, resistant to damage from impacts and vibrations, and consume far less energy than standard lamps.
