LEDFUL10-DL-RGBW-PM-1X

25W Underwater LED Dock Light - Add-on Lamp for Dock Light Package LEDFUL10-DL-RGBW-PM-KT.3X

Product ID: 154744

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

LEDFUL10-DL-RGBW-PM-1X Underwater LED Light Package

Lamp Type: LED
Dimensions: 3.85" x 0.71"
Weight: -
Watts: 25
Voltage: 10-30V DC
Lumens: 2,000+
LED Lifespan Expectancy: 50,000+ hours
LED Color (Non-dimming): Full Color RGBW
Color Temperature: 6500K
Color Rendering Index (CRI): 70+
Amps: 2.1A @ 12V DC, 1.1A @ 24V DC
Ambient Operating Temperature: -31°C to +55°C
Materials: Bronze, 316 Stainless Steel Fasteners, PVC Plastic Mounting Hardware
Mounting: Dock Pilings/Poles Up to 14" Round OD or 12" Square OD - Zip Mount

Ratings/Features

IP68 Compliant
Timed Toggled Protocol
Submersible up to 6 Feet
Add-on Light for Dock Light Package

The LEDFUL10-DL-RGBW-PM-1X Underwater LED Dock Light is an extremely efficient and versatile lighting solution for docks, walkways,

cabin areas, stairs, vehicles and marine locations. The 25-watt unit is an add-on for the LEDFUL10-DL-RGBW-PM-KT.3X dock light package. Constructed of bronze, the IP68 compliant LED light caters to dock piling/pole mounting applications and is offered in full color RGBW.
The LEDFUL10-DL-RGBW-PM-1X is an add-on light for the Larson Electronics dock light package, which can be used for superior illumination around docks and marine structures. This 25-watt LED light operates on low voltage 10-30V DC and provides 2,000+ lumens of total output. Timed Toggled Protocol (TTP) enables the LED lamp to be controlled without external control boxes or special switches. These LED lights are offered in full color RGBW.
Constructed of bronze for durability and corrosion resistance, the unit is fully sealed, weatherproof, submersible to 6 feet and IP68 compliant. Measuring only 3.85" in diameter and 0.71” in total thickness, the LED light is very low profile and easy to mount unobtrusively.

LED Benefits: Unlike gas burning and arc type lamps that have glass bulbs, LEDs have no filaments or fragile housings to break during operation and/or transportation. Instead of heating a small filament or using a combination of gases to produce light, light emitting diodes (LEDs) use semi-conductive materials that illuminate when electric current is applied, providing instant illumination with no warm up or cool down time before re-striking. Because there is no warm up period, this light can be cycled on and off with no reduction in lamp life.
LED lights run at significantly cooler temperatures than traditional metal halide and high pressure sodium lights and contain no harmful gases, vapors, or mercury, making them both safer and more energy efficient. No extra energy is wasted in cooling enclosed work areas due to external heat emissions from bulb type lights, and the operator risks associated with traditional lighting methods, such as accidental burns and exposure to hazardous substances contained in the glass bulbs, are eliminated. In addition, LEDs are also safer for the environment as they are 100% recyclable, which eliminates the need for costly special disposal services required with traditional gas burning and arc type lamps.
Wiring: Negative and positive leads power the LED lamp from a low voltage source. During setup, electrical connections are passed through a conduit, which protects the wires from outdoor elements. All LED lights are connected via a control box (not included), which plugs into standard outlets.
Mounting: Suitable for marine environments, the LEDFUL10-DL-RGBW-PM-1X can be mounted around square (up to 12" OD) or round (up to 14" OD) dock pilings and poles. During installation, operators can secure the LED lights using an included PVC plastic zip-mounting component that wraps around the piling or pole. We also carry an alternative underwater LED unit that is submersible to 60 meters you can view here.
Applications: Boat lights, pilings, poles, marine locations, docks, marine structures, general area illumination and more.
At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
