**Circuit Breaker Features:** This MPD-SWGR-MV-XX-SP9607 features an electronically controlled LSIG (Long-Time, Short-Time, Instantaneous, and Ground Fault) trip unit with a 200A rating plug, 125VDC electric operator, remote close, shunt trip, bell alarm with lockout, and a 3-stage auxiliary switch. The draw-out retrofit assembly includes a modified trim plate

and is designed for replacement of existing draw-out insulated case circuit breakers while maintaining form, fit, and function.

**Circuit Breaker Applications:** Retrofit replacement of existing ABB/GE Power Break I draw-out insulated case circuit breakers in low voltage switchgear. Suitable for switchgear modernization projects requiring replacement, installation, testing, and commissioning.

Larson Electronics is a manufacturer and as such can build stationary and portable transformer systems to your specifications. Although we carry several models of power distribution transformer systems, we can deliver custom ordered units almost as quickly as our prebuilt units. If this model does not meet your needs, please contact us at 1-800-369-6671 or sales@larsonelectronics.com to discuss your specific requirements.
