Made in Texas

The VMP-AM-F150-2017 from Larson Electronics is a Permanent Antenna Mounting Plate that allows operators to install up to four antennas on their 2017 Ford F150 aluminum body trucks without drilling any holes. This antenna mounting plate is ideal for law enforcement, DOT workers and anyone else who needs to easily mount an antenna, but doesnt want

to drill holes in their truck. This lightweight mounting plate allows operators to mount antennas on their trucks without drilling into the body of the truck itself. This mounting plate can support antenna arrays of up to 20 lbs. The VMP-AM-F150-2017 features four predrilled 1/2" holes for antenna mounting and is compatible with 2017 Ford F-150 aluminum body pickup trucks.

The VMP-AM-F150-2017 is constructed in Texas from durable aluminum for the frame, brackets and the mounting plate surface. This mounting plate has been designed for 2017 model year Ford F-150 aluminum body pickup trucks and offers operators a sturdy and reliable platform to deploy permanent mount CB antennas, radio antennas and antennas from other equipment on the top of their truck for optimal performance. The VMP-AM-F150-2017 is installed via the rear cab lights and has a weatherproof seal on the back side for secure, dry installation and protection against scrapes to the body of the truck. The mounting plate requires absolutely no drilling for installation and is powder coated for added durability, can support up to 20 lbs and is offered in a black, white, or grey finish. The VMP-AM-F150-2017 also features a windload okay for highway speeds. (User provided equipment may vary.)

Installation of Lights/Equipment: The VMP-AM-F150-2017 comes predrilled with four 1/2" holes that allow for the secure mounting of various antennas. Depending on the number of holes required for mounting various types of antennas, this mounting plate can hold up to four antennas. Then the entire assembly can be mounted to the truck via the third brake light as explained below.

Truck Installation: The VMP-AM-F150-2017 is easy to install and requires absolutely NO drilling to mount to the truck. This mounting plate installs via the 3rd brake light on 2017 model year Ford F150 pickup trucks between the body of the truck cab and the light. Operators simply remove their 3rd brake light, position the mounting plate bracket and reinstall the light through the bracket. Having a reverse camera in the 3rd brake light (NOT in the tailgate or bumper) will change the mounting bracket design. Those with a camera must choose the "camera" option in order to get the correct design. Please choose the appropriate option below.

***Please note that the VMP-AM-F150-2017 is designed for trucks with**

incandescent 3rd brake lights ONLY. Operators with LED 3rd brake lights will require the VMP-AM-F150-2017-LED. Incandescent mounting plates and LED mounting plates are NOT interchangeable.*
