INSTALLATION

We strongly recommend only a licensed electrician install this product. Make sure power is disconnected prior to installing. Fixture must be mounted to a surface that can structurally support the load.

The fixture will be supplied with the desired cord cap/whip already affixed to the housing.

Mount following the steps below:

1. Turn off power at electrical panel.
2. Mount light by its trunnion mount to a flat surface. Utilize bolts through predrilled mounting holes.
3. Adjust lamp vertically by loosening hex bolts on either side.
4. Swing lamp into final position and tighten any loose bolts.
5. Wire the whip/power cord to existing power source. Follow proper steps to weatherproof electrical connections as necessary.

   Voltage: 120-277V AC

6. Turn power on.

This light is “instant-on” and will illuminate once power is supplied to the unit.
