I. Operating Instructions - RL-15-LED-CPR

WARNING: *While the charger is intelligent enough to back off the charger when the battery is fully charged, it is not recommended that you leave the light on the charger indefinitely. Ultimately, the heat created by the charger and the battery will degrade the components. Leaving the battery to charge for a day will not cause damage however, leaving the battery to charge for multiple days or weeks continuously will degrade the life of the charger and the battery.*

1. This rechargeable floodlight can be charged at any location using a computer, vehicle USB adapter or a wall USB charger. The charger connects to the light at the base. The light can be powered on by pressing the on/off button located on the front of the magnetic base.

2. The charger will have a solid red indicator light when the battery is charging.

3. Charge time will vary based on remaining battery charge and battery condition. Maximum charge time is 4.5 hours.

4. The spotlight can be turned on while the charger is plugged in however, the spotlight will not charge while the light is being operated.

5. This LED spotlight has a lithium-ion battery. The battery can be charged as little or as much as desired without “memory” issues. Lithium ion batteries do not need to be fully drained before charging nor fully charged before continuing usage.

6. The LED indicator will turn green when the battery is fully charged.

7. Lithium ion batteries generally will discharge very slowly while not being used. You can expect a fully charged lithium ion battery to last 9-12 months on the shelf if the light was fully charged when stored.

NOTE: It is important to ensure that this light is sitting on a flat surface in order for the magnetic base to get a firm grip. Failure to do so can result in the light falling off of the mounting surface.

II. Maintenance and Battery

I. Maintenance

Charge this spotlight using only the provided charger and cord.

Charge this spotlight every 2 months during periods of non-use.

Unplug the unit and allow to cool before attempting to clean any part.

Only use a soft cloth moistened with a mild solution of water and detergent on the outer surface of the spotlight when cleaning.

Periodically inspect the condition of recharge adapters, connectors and wires. Replace any components that may have become worn or broken.

This spotlight is designed to provide years of service however, when the internal battery reaches the end of its service life, the battery should be properly disposed of.

II. Battery Disposal

Do not dispose of the battery in fire as this may result in an explosion. Do not expose battery to fire or intense heat as it may explode.

Before disposing of the battery, protect exposed terminals with heavy-duty electrical tape to prevent shorting (shorting can result in injury or fire).

When the battery reaches the end of its life, it should be disposed of properly. Recycling is required, contact your local authority for information on disposal procedures. Failure to comply with local, state and federal regulations can result in fines, or imprisonment.

III. Warnings and Features

I. Warnings

WARNING: Never place spotlight face down when light is on or is still hot from recent use. Doing so could burn/ignite surfaces such as sets, carpets, etc. and cause major property damage. Always turn off when not in use.

WARNING: Always unplug charger from light and power source when not in use.

WARNING: To prevent serious damage to eyesight, never look directly into light when light is on. **DO NOT** shine light into the face of someone else.

WARNING: DO NOT allow children to handle or operate this spotlight.

WARNING: DO NOT use this product for anything other than its intended use.

WARNING: DO NOT charge or operate in close proximity of combustible or flammable materials.

WARNING: DO NOT charge battery in gas tight enclosure.

WARNING: DO NOT attempt to charge battery pack using both AC and DC chargers at the same time.

WARNING: DO NOT attempt to charge or operate this spotlight if cord, plug, battery, bulb or any other part of the spotlight is damaged or corroded.

WARNING: Use only charging devices that are provided with this rechargeable LED spotlight or its replacements (see replacement parts on Page 5).

WARNING: DO NOT disassemble or tamper with the battery pack.

WARNING: DO NOT dispose of battery in a fire as this might result in an explosion.
