EPL-EMG-24-2L-Ballast

Emergency Backup Ballast for the EPL-24-2L series - Class I, Div. I Explosion Proof Light

Product ID: 50796

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

Buy American Compliant

The EPL-EMG-24-2L-Ballast is the replacement ballast for our EPL-EMG-24-2L and EPL-EMG-24-4L series emergency fixtures and will operate with our T8 and T12 fluorescent bulbs.

This universal input emergency ballast works in conjunction with an AC ballast to convert new or existing fluorescent fixtures into emergency lighting. The emergency ballast handles a wide range of input voltages and frequencies and consists of a high-temperature nickel-cadmium battery, charger and electronic circuitry in one compact case.

The EPL-EMG-24-2L-Ballast will run a single lamp at 900 lumens for 90 minutes. The light recharges the battery once standard electrical power is restored. The ballast can be mounted on top of the fixture or in the fixture wire way. This ballast can be used with our T8 and T12 fluorescent lamps.
