EPLC2-3X100LED-4-100-162

Replacement Polycarbonate Lens Pack for EPLC2-3X100LED-4-100 C2D1/C1D2 Flood Light System

Product ID: 71243

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

Polycarbonate Shield for the EPLC2-3X100LED-4-100 LED Flood Light System series. Over time, blasting and spraying can lead to particles reaching the lens of the light fixture. With the polycarbonate shield, operator will not have to worry about such inconveniences. For blasting and tank cleaning applications, any dust or debris buildup will be on the polycarbonate lens, not the fixture. Any exposure to abrasive materials will wear away at the lens, protecting the LED fixtures behind. For paint spray applications, any paint over spray buildup will accumulate on the lens and not the lamps. Cleanup involves removing old lenses and replacing with new lenses instead of removing the over spray from the fixture itself.
This replacement pack contains three polycarbonate replacement lenses.
