

Golight Mounting Plate for 2018 Freightliner Mid Size Truck - Instruction Manual

Thank you for your purchase of the new Golight mounting plate for the 2018 Freightliner Mid Size Truck. This plate is designed for the mounting of a Golight Radoray or Stryker series light onto your Freightliner work truck. These instructions will cover the installation of the plate onto the truck only. Golight Radoray or Stryker installation instructions are provided with the Golight.

Mounting

The GMP-HMT-V1-FREIGHTLINER-2018 from Larson Electronics is designed to be mounted to the hood of a 2018 Freightliner Mid-Size work truck, but can be mounted to any flat surface capable of supporting the load where three mount holes can be drilled. Mounting is achieved by pre-drilling three holes through the mounting surface in the same pattern as the bottom plate of the GMP-HMT-V1-FREIGHTLINER-2018. Align the plate with the pre-drilled holes, then fix the plate to the surface using three 1/4" bolts with washers through the top of the bottom plate. We recommend using washers and locking nuts on the bottom to prevent the bolts from loosening through vibration. Mounting hardware is not included.

Adjustments

The GMP-HMT-V1-FREIGHTLINER-2018 features leveling ability with the help of an adjustable bracket that can tilt up and down to level with the vehicle's contour. To adjust the plate's vertical angle, loosen the adjustment bolts at either side of the mounting plate, adjust the plate to the desired angle, then tighten the adjustment bolts to hold the plate in position. Be mindful of wiring when making adjustments to avoid pinch points.
