Larson Electronics LLC WWW.MAGNALIGHT.COM
9419 E US HWY 75, Kemp, TX 75143 - P: 903-498-3363 F: 903-498-3364 E: sales@magnalight.com

Instructions:

TX-500VA-4XAO

IMPORTANT:

The slider switch within the weatherproof cover moves the voltage on the secondary side from 12 volts to 24 volts AC. This is designed for longer wire runs on the secondary side. Many operators will increase the voltage at the power distribution box for wire runs over 100 feet. This enables the low voltage bulbs to receive 12 volts at the end of the wire, as 14 volts degrades to 12 volts over 100 feet.

PLEASE LEAVE THE DIMMER SWITCH IN THE FULLY "DOWN" POSITION FOR 12 VOLT OPERATIONS. THE FULLY "UP" POSITION IS 24 VOLTS.

Other features:

- Fuse
- GFI 120V outlet
- 4 12/24 VAC twist lock outlets with GFI protection
- Carry handle
- Elevated base
