Military Tactical LED Flashlight
(2) Output Levels - Mil-spec Hard Anodized - USB Rechargeable
Instruction Manual

Thank you for your purchase of the Larson Electronics FL-MK-LED-63 Military Tactical LED Flashlight.

WARNING: Use of light in “strobe” mode may cause seizure in persons with photosensitive epilepsy.

CAUTION: The Larson Electronics FL-MK-LED-63 Military Tactical LED Flashlight provides a powerful beam.

When operated for a long time, it will get uncomfortably warm. This is NORMAL and is not a defect. Any LED flashlight of similar size and performance will produce similar amounts of heat during operation. The only way to reduce operating heat is to SIGNIFICANTLY lower the output, or increase the size of the flashlight. While this heating may trigger the drop reflex if an unattended hot light is picked up, the temperature does not present a burn hazard. When used tactically for short periods of time to clear a room, check for intruders, etc., heating will not be a problem.

BATTERY WARNING: FIRE, EXPLOSION, BURN HAZARD
USE ONLY: Provided 18650 USB rechargeable battery, or (2) matching CR123A batteries (not included). Use of other batteries or mixing of used and new or different brand batteries may result in leakage, fire or explosion and serious personal injury. DO NOT recharge, misuse, short circuit, improperly store or discard, disassemble, or heat above 212°F (100°C). Keep away from children.

Note: This product is not designed to use rechargeable CR123 batteries.

CAUTION: To reduce risk of fire, electrical shock, or personal injury, handle the battery carefully and never allow it to short circuit. Do not incinerate the battery as it may explode in a fire.

WARNING:
The Larson Electronics FL-MK-LED-63 Military Tactical LED Flashlight utilizes a high Lumen LED that can get very hot. Never place the flashlight face down against a flat surface or against any flammable object. Transport or store the flashlight in a way that minimizes the chance it can accidentally be turned on.

BATTERY INSTALLATION/REMOVAL
Uses one 18650 rechargeable battery or two CR123 batteries. Unscrew the tail cap and remove depleted batteries, insert fresh batteries positive end first, replace and tighten tail cap.

18650 USB BATTERY CHARGING
The Larson Electronics FL-MK-LED-63 Military Tactical LED Flashlight USB system ships with an 18650 USB Li-Ion battery with integrated charge port. **Note:** Fully charge battery before first use.

To charge the 18650 USB battery, insert the micro-USB plug into the connector near the positive end of the battery. The battery may be left plugged into a micro-USB cable continuously, there is no danger of overcharge.

LED Charge Indicators
- Charging…Red LED is on.
- Charged…Green LED is on.

Charge time is approximately 5 hours when using AC adapters. The included 18650 battery is USB rechargeable outside of the flashlight and must be removed for charging. Compatible with other non-USB rechargeable 18650 batteries with external charging bank.

GENERAL OPERATION
The Larson Electronics FL-MK-LED-63 Military Tactical LED Flashlight features a programmable switch with momentary operation (light press or tap) and constant on operation (press until click). The light is shipped from the factory in the default High-Strobe-Low program.

- **High:** Tap and hold; click to lock on; click again for off.
- **Strobe:** Fast double-tap (within 0.4 seconds) and hold; click to lock on; click again for off.
- **Low:** Fast triple-tap (within 0.4 seconds per tap) and hold; click to lock on; click again for off.

Accessing Other Programs
The Larson Electronics FL-MK-LED-63 Military Tactical LED Flashlight features a TEN-TAP® programmable switch allowing the user to select one of three different programs. To change to the next program, starting from the “Off” position, tap the switch rapidly 9 times (within 0.4 seconds per tap) and hold it down the 10th time. Continue holding the switch until the light turns off (approximately 1 second), then release the switch.
Available programs are **High-Strobe-Low** (Factory Default), **High Only** or **Low-High**.

USE AND CARE
The Larson Electronics FL-MK-LED-63 Military Tactical LED Flashlight contains no user serviceable parts. Should you need repair or replacement, contact Larson Electronics.
