

Adjustable Telescoping Light Pole, 3 Feet to 8.5 Feet Instruction Manual

Do not attempt operation until you are familiar with all warnings, precautions, and procedures outlined within this instruction sheet. Read carefully before operating. Retain these instructions for future reference.

WARNING:

- INSTALL AWAY FROM ANY ELECTRICAL WIRES OR OVERHEAD POWER LINES.
- DO NOT OVERLOAD TELESOPING POLE.

The TPM-12 is a telescoping pole that allows operators to elevate lights, speakers and other electrical devices and adjust their height from 3 feet to 8.5 feet. Designed to be mounted to flat surfaces via a 4 hole mounting plate, this telescoping pole can be adjusted to various heights and locked into position as well as collapsed and removed from the mounting bracket for stowing.

LIGHT POLE OPERATION

NOTE: Mounting bracket sold separately on our website with sku TPM-MOUNT. Mounting bracket is only included with TPM-12-V2 variant of this product.

1. Utilize the predrilled holes and mount the flat bracket in a location that can support the load.
2. Place telescoping pole in base mount and tighten base mount hand screw until snug.
3. Place device on mounting plate using predrilled mounting holes.
4. Place mounting plate over the top pole and tighten hand screw.
5. Loosen the black adjustment knob for each adjustment sleeve to extend the tripod. Start with the top section when lifting.
6. Tighten adjustment knob once desired height is achieved.

This pole features a pneumatic braking system that prevents unexpected or sudden collapse of the pole. If the pole is loaded with a pair of heavy fixtures for instance and the operator inadvertently releases the locking tabs, the pole will simply ease down gently rather than suddenly collapse. This is a great feature when mounting expensive electronic devices and you'd like the added security of knowing there is no chance of serious damage should the pole be released.

USE AND CARE

Always check damaged or worn out parts before use. Broken parts will affect operation. When not in use, store in a secure place out of the reach of children. Inspect it for good working condition prior to storage and before re-use.

Specifications / Additional Information

TPM-12 Adjustable Mounting Pole

Materials: **Aluminum**

Dimensions: **3' to 8.5' Extendible Pole**

Mounting: **Predrilled 4 Hole Mounting Plate**

Fixture Mounting: **Predrilled Aluminum Platform**

Features: **Slow Release Pneumatic Braking**
