

Hardware Mounting Kit for VMP-MAM Antenna Mounting Plates

Instruction Manual

The VMP-MAM-xx-V1-SP0012 hardware mounting kit for antenna mounting plates consists of toggle bolts, screws, and washers used to mount VMP-MAM plates to the vehicle. This instruction will be generic, as each specific plate receives it's own manual covering installation specifics. Please refer to the manual that came with your plate if you need more information, or contact Larson Electronics.

Installation

This will be generic installation instruction, as each model of plate receives it's own manual specifically covering the installation of that plate. **Refer to the manual for your plate** if you need more information, or contact Larson Electronics.

Toggle bolts are used in installation of vehicle mounting plates to alleviate the stress on stock brake light hardware.

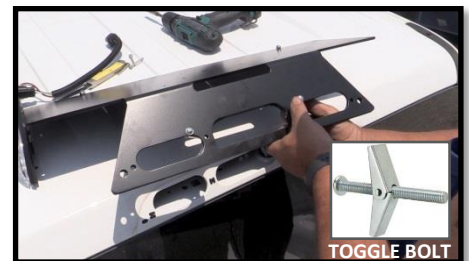

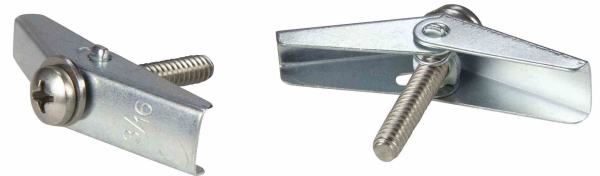

Start by removing the plate or old hardware from your vehicle, if necessary. Follow instructions that came with your plate in reverse order to remove.

Inspect the gasket on the back side of the plate to verify surface is free of any defects or foreign material.

Place the mount plate on your vehicle and partially install stock brake hardware to ensure proper alignment. Place toggle bolts behind the plate and adjust them against the inside of the frame of the vehicle, as shown in pictures.

Once proper alignment is achieved, tighten toggle bolt screws to secure in place. Do not over tighten these screws to prevent damage to the bolts and/or your truck. However, ensure that the screws used to compress the gasket are evenly tightened, uniformly sealing the plate to the truck and firmly compressing all areas of the gasket.

Complete remainder of plate installation per instructions that came with your plate.

USE AND CARE

Unauthorized modification may impair the function and/or safety of this device and could affect the life of the equipment. Always check for damaged or worn out parts before using the device. Store it in a secure place out of the reach of children when not in use. Inspect for good working condition prior to storage and before re-use.

REPLACEMENT PARTS

The VMP-MAM-xx-V1-SP0012 is designed to provide years of reliable performance. Should the need for replacement parts arise, please contact Larson Electronics.

THESE INSTRUCTIONS MAY NOT COVER ALL DETAILS OR VARIATIONS OF THIS PRODUCT FOR YOUR EQUIPMENT OR INSTALLATION REQUIREMENTS.
