RL-11

FEATURES

- Lithium-ion battery pack with up to 90 minutes run time per charge
- Ballast operates on 12 or 24 volt DC power
- Water resistant design, safe to use in adverse weather conditions (light is not submersible)

OPERATION

The power button is located on the top of the handle for thumb access.

- Turn the lamp on by fully depressing the power button one time.
- Turn the lamp off by fully depressing the power button again.

BATTERY

- In order to charge the battery, you must unscrew the end cap at the back of the light.
- Once the cap is removed, you will see a point to connect your AC charger cord adapter.
- Remove the rear cap, remove battery and attach the charger.
- The battery pack will show a red LED during the charging and green LED when fully charged.

DO NOT OPERATE LAMP WHEN CHARGING THE BATTERY.

- Charger is designed with input power ranging from 100 to 240 volt 50 or 60 cycle. Plug adapters (adapting US plug to your country's plug) required.

ACCESSORIES AVAILABLE INCLUDE:

- ❖ C-10CC-D – 10 foot coil cord with cigarette plug and Deutsch connector – runs on 12 V or 24V DC power from vehicles and/or boats
- ❖ RL-battery – spare battery
- ❖ RL-red – red lens
- ❖ RL-amber – amber lens
