Powder coated, stamped steel mounting box. The box is completely enclosed. An access hole in the rear of the unit is large enough to enable the connectors for the Golight Radioray 2020 and Golight Radioray 2067 to pass through the back.

DOES NOT INCLUDE WIRED REMOTE CONTROL

4 of 10-32 machine screws hold the remote to the box. They also secure the rear enclosure to the front of the mounting box.

The box can be used as a handheld dash mount remote or mounted to any surface via 4 10-32 screws

This box has 2 purposes. For those needing a wired handheld remote control for the Golight Radioray 2020 (Golight 2067) or Golight 2020-M (Golight 2067 - magnetic mount), this is an option. Additionally, this mounting box eliminates the need to cut a hole in the mounting surface (dash etc.). Instead, you can drill 4 small holes and mount the controller. No cut out necessary.

MAINTENANCE

There are no serviceable parts inside the fixture. However, it is good practice to routinely clean and check the fixture for proper function.
