LEDPL-3

OPERATING INSTRUCTIONS

INSERTING THE BATTERY

1. Unscrew end cap and insert battery, with positive (+) connection toward light head.

OPERATING THE LIGHT

1. After you have inserted the battery, you can press the end cap switch to illuminate the flashlight.
2. The beam can be adjusted slightly by grasping the body of the light in one hand and twisting the head.

NOTE: Keep light away from flame or extreme heat, as this can cause the lithium battery to explode.
