LEDSL-10W

Before installing your light, please read all the instructions below.

INTRODUCTION

The light adopts high power LEDS as light sources with unique appearance, compact structure, convenient operation, and diversified flash patterns. With superior circuit design, its characteristics are high brightness, low working current, easy installation and long service time. It is specially designed to assist all types of emergency vehicles. Users can easily find out and confirm the flashing mode needed by special indication.

Red: Vin + Black: Vin - White: Trigger (touch with vin+) Green: Sync Signal

TECHNICAL DATA

Working Voltage: DC10V-DC30 Lighting Power: 10W

Color Options: Red, Blue, Amber, And White Mounting: Permanent

Flash Patterns: 14

1. Quad Flash and Single Flash (T=710MS)
2. Quad Flash (T=710MS)
3. Double Flash (T=710MS)
4. Single Flash (T=710MS)
5. Double Flash and Single Flash (T=710MS
6. Five Consecutive Flash (T=710MS)
7. Single Flash 1 and Single Flash 2 (T=710MS)
8. Single Flash (T=1000MS)
9. Single Flash (T=400MS)
10. Single Flash (T=200MS
11. Single Flash (T=800MS)
12. Double Flash (T=400MS
13. Slow Single Flash and Quick Single Flash (T=279MS)
14. Slow Single Flash and Quick Single Flash (T=1180MS)

WARNING

This light utilizes high-intensity LED lamps. Do not stare directly into the light while it is on as momentary blindness and/or permanent eye damage may occur.
