120VAC LED Strobe Light, Permanent Mount

Instruction Manual

Thank you for your purchase of the Larson Electronics LEDB-4-120VAC. Follow the steps below for operating the unit.

Prevent Electrical Shock: Carefully Read All Warnings and Instructions First. Check that the unit has not been damaged during transport.

WARNING: Consult a qualified electrical professional/electrician to install this device in accordance with appropriate local and NEC codes and regulations.
WARNING: Do not connect line voltage wires to low voltage terminals!
WARNING: Device is suitable for installation in wet locations; GFCI protection recommended.
WARNING: Although fixture is waterproof, it is NOT designed or intended to be submerged.
WARNING: Do not allow line voltage wires to become submerged!
WARNING: Edges may be sharp, handle with care.
WARNING: If unsure about any part of these instructions, consult a qualified electrical professional.

- All outdoor installations and indoor installations near a wet location require the use of a GFCI device for safety, according to the National Electrical Code® (NEC).
- If dropped or damaged, the unit may no longer be waterproof and should be replaced.
- To avoid hazards to children, account for all parts and destroy packing materials.

1. Mount the beacon in your desired location. The unit mounts via 3 screw holes located on the base and includes a gasket for secure placement.
2. Attach all deutsch connections.
3. Run cable and transformer to a suitable area out of direct sunlight.
4. Plug the unit into a 120VAC power source.
5. The LED beacon will illuminate once power is supplied. If not, double check all connections.
