40W LOW PROFILE LED STROBE LIGHT BAR
(4) MAGNETIC MOUNT FEET - 10-30VDC - 15' CIGARETTE PLUG-IN
INSTRUCTION GUIDE

The 9200-LED-S-M from Larson Electronics is a Low Profile Amber LED Strobing Light Bar that features 15 different flash patterns, high visibility and 360° coverage. The four magnetic feet offer fast and secure mounting to flat magnetic surfaces such as the roof of a vehicle. This strobing LED amber light bar is equipped with a 15' cord terminated in a cigarette plug for convenient use on vehicles.

MOUNTING

Mount to any flat metal surface capable of holding the weight of the light. It should be mounted horizontally to achieve maximum visibility.

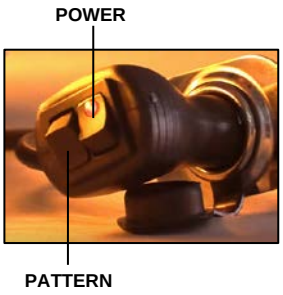

FIGURE 2

NOTE: *When removing, lift from center as shown in **Figure 2**. Do not drag the magnetic base to disconnect, as it may scratch the surface/paint.*

OPERATION

The light bar is equipped with a 15’ cord terminated in a cigarette plug. Plug the light bar into your vehicle’s power source. The light bar operates within 10-30V DC. An on/off rocker power switch on the cigarette plug powers the light on or off. ***Note:*** *There is no difference in light output between voltages.*

FLASH PATTERNS

A momentary toggle switch on the cigarette plug cycles through the various available light patterns.

With the light bar turned on, momentarily toggle the switch and the light bar will change to a new pattern. Continue this process until the desired light pattern is selected. The light bar will retain memory of the last used flash pattern. To reset, hold the toggle switch for 5 seconds.

REPLACEMENT PARTS

The 9200-LED-S-M is designed to provide years of reliable performance. Should the need for replacement parts arise, please contact Larson Electronics at the contact information below.

Should further information not covered by these instructions be required, please contact Larson Electronics at 1-800-369-6671 or sales@larsonelectronics.com for further assistance.
