48W LED Flood Light with Magnetic Mount

Instruction Manual

48 Watt LED Work Light
Important safety instructions
WARNING: Read all instructions carefully
SAVE THESE INSTRUCTIONS
CAUTION: RISK OF ELECTRICAL SHOCK

Do not use with extension cord near water or where water may Accumulate.
Keep plugs and receptacles dry

The 48 watt LED light can illuminate an area 300 feet in length by 240 feet in width with 2,880 lumens of brilliant illumination and operates from standard 120-277V AC electrical current. Included with this LED work light is 25 feet of chemical and abrasion resistant SOOW cord with straight blade plug for easy connection to standard wall outlets. This versatile work light can be used as an overhead light, pedestal light, and just about anywhere portable and economical yet powerful illumination is needed.

The aluminum mounting bracket on this unit consists of a three leg frame constructed of 1" square aluminum tubing, three 200lbs grip magnetic feet, an adjustable 48 watt LED light, and 25 foot 16/3 SOOW (abrasive and oil resistant) cord. The magnetic mounting system on this light has a total of 600lbs magnetic gripping force.

CAUTION: BECAUSE THE WAL-M-LED48-1227 HAS A MAGNETIC BASE, IT IS LIKELY THAT IT WILL BE PLACED IN AN ELEVATED POSITION ABOVE THE GROUND. THEREFORE CAUTION SHOULD BE USED TO BE CERTAIN THAT THE MAGNET IS SECURELY ATTACHED TO THE METAL SURFACE BEFORE RELEASING THE LIGHT.

MAINTENANCE

There are no serviceable parts inside the fixture. However, it is good practice to routinely clean and check the fixture for proper function.

Disconnect power running to the light and be sure the fixture is cool to the touch.

Use a non-abrasive glass cleaning solution to clean the lens.

Note: It is not necessary to open the fixture and clean or touch the LED's.

TROUBLESHOOTING

Refer to the guide below or contact the manufacturer if the fixture does not function properly.

- ➔ Is the correct line voltage being supplied to the fixture?
- ➔ Is the fixture properly grounded?
- ➔ Make sure installed power switches, photocells, etc. are functioning properly. *(If applicable)*
