

2600-WP Battery 2600mAh – Waterproof Instruction Guide

2600mAh rechargeable lithium-ion waterproof battery, Rating: IP67 (Waterproof to 2 meters limited duration).

BATTERY REPLACEMENT

The flashlight is modular in design. Replacement of the lithium battery module is as follows:

1. **To remove the battery:** Power off light and carefully rotate the battery counter clockwise away from the ballast housing.
2. **To replace the battery:** Be careful to line up the battery with the ballast and rotate the battery clockwise on to the ballast housing, be careful not to cross thread. Tighten snugly.
3. **DO NOT FORCE OR OVER TIGHTEN** as damage will occur and you will void your warranty.

NOTICE:

While replacing the battery, please make sure that your flashlight is in the "OFF" position; otherwise damage can result to the lithium battery, electronic ballast and electrical connection between ballast and lamp

It is recommended to fully charge battery before first use.
