18 Watt LED Flood Light
1400 Lumens - Six 3-Watt LEDs - 10-32 Volt DC - IP67 Waterproof
Instruction Manual

Familiarize yourself with all procedures outlined within this instruction sheet.

WARNING:

READ CAREFULLY BEFORE OPERATING FIXTURE. RETAIN THESE INSTRUCTIONS FOR FUTURE REFERENCE.
CRITICAL SAFETY INSTRUCTIONS:

- Never place light face down when light is on. Doing so could burn/ignite surfaces such as seats, carpeting, etc. and cause major property damage. Always turn flood light off when not in use.
- To prevent serious damage to eyesight, never look into flood light when turned on.
- **DO NOT** shine light into the face of someone else.
- **DO NOT** touch lens of light when on or recently on. The lens/cooling fins will be hot after long periods.
- **DO NOT** allow children to handle or operate this flood light.
- **DO NOT** use this product for other than its intended use.
- **DO NOT** operate in close proximity of combustible or flammable materials.
- **DO NOT** attempt to operate this flood light if cord, plug, lens or any part of the flood light is damaged or corroded.

The IL-LED-18 LED Light Bar offers high light output from a compact form factor and is ideal for a wide range of uses including heavy equipment, boating, vehicle, military, law enforcement and industrial manufacturing applications. This unit produces a 1400 lumen light output with very low amp draw, 30,000 hour service life and 10 to 30 volt compatibility which provides operators with a compact and powerful LED lighting solution.

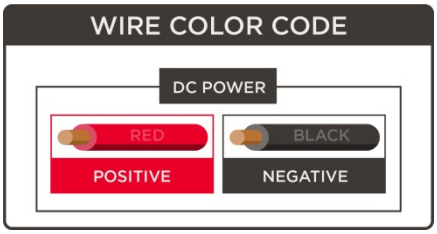

POWER

1. The flood light is designed to work on 10-32 volts DC. This variable voltage allows the light to be connected to consumer vehicles and other non-standard power supplies such as military vehicles and heavy equipment.
   PLEASE NOTE: *There is no difference in light output between voltages.*
2. Power transformers (DCP-11-DP) can be purchased through our website to run this flood light from household wall outlets.

MOUNTING

The IL-LED-18 is suspended within a form fitting trunnion (yolk-type) mount. This trunnion mount has a single bolt that can be loosened, allowing the LED light to be adjusted vertically, then re-tightened to lock the light into the desired position. A single stainless steel stud protrudes from the bottom of the mount, enabling the operator to install the light using a simple through-hole mount.

WIRING

- Power is attached via cord on back of light.
- See wire diagram for connecting power. Red is positive and Black is negative.
- Take appropriate measures for waterproofing connections when installed in an area prone to getting wet. The LED lamp is IP67 rated waterproof and can withstand immersion up to 1m.
