The HAL-24-16W-LED-WHT from Larson Electronics is a Low Profile Hazardous Location Lighting Solution that is approved for Class I Division 2 Groups A, B, C & D environments and UL 1598 compliant for use in wet locations. This powerful 24" long LED strip light produces 2,600 lumens, operates on 11-25V AC/DC, and is suitable for a variety of applications.

## WIRING

This light operates on low voltage 11-25V AC/DC current. Each strip light is equipped with 6 feet of 16/3 SOOW cable for making power connections.

### Standard pigtail(flying leads) wiring

***We strongly encourage a licensed electrician install this product***, in all locations especially in outdoor areas where weatherproofing may be required. Universal voltage driver permits operation at low voltage 11V to 25V AC/DC.

**Warning:** *Check product label for correct input voltage!*

**Attach supply line wires to the appropriate light fixture wires as shown in the diagram ➔**

Secure each pair of wires according to the diagram. Utilize a junction box or similar device and take precautionary steps for weatherproofing all connections if installed in a location where water may come in contact with the unit. Ensure the unit is properly grounded and that wiring is done according to all local and national electrical/building codes.

### Low Voltage DC

Connect power to power supply outputting low voltage between 11-25 Volts DC. This variable voltage allows greater versatility without affecting light output. Ensure deutsch connectors are properly connected (If applicable)

### WIRING

Mounting for this unit is provided by two standard adjustable end brackets that allow operators to mount the light to flat surfaces and then adjust the light 170° vertically for the best placement. The entire assembly weighs 2.1 lbs and measures 24 inches in length, 2.68 inches wide and 1.69 inches deep, making it ideal for mounting in areas where space is limited and a low profile fixture is more readily installed.

## MAINTENANCE
