

Replacement Lens for Larson Electronics BLG-LED-4REX Intrinsically Safe Blasting Light LED Blast Gun Instruction Manual

Do not attempt operation until you are familiar with all warnings, precautions, and procedures outlined within this instruction sheet. Read carefully before operating. Retain these instructions for future reference.

INSTALLATION

Remove original lens by pulling directly out of slot. Take the new replacement lens and insert directly into slot. (see example to the left) If met with heavy resistance do not force lens out as this could damage it. Instead make sure LED Module is proper installed. Instructions are below.

INSTALL/REMOVE LED MODULE

Remove the four screws at the front of the protective lens cap on the gun mount. Once removed, separate the front cap from the rest of the mount. Wiggle the light back and forth until you are able to slide it through the front of the mount. Insert the new light by placing the back end of the light through the mount and pull tight to ensure it is snug. Replace the protective lens cap and re-insert the four screws to fasten the cap to the mount.

NOTE: Install protective lens prior to use in the field!

BATTERY REPLACEMENT

Simply unscrew the tail cap and slide the battery from the flashlight. Replace the battery inserting the contact end first and reattach the tail cap.

REPLACEMENT PARTS

The Larson Electronics LED blast gun light is designed to provide years of reliable lighting performance. Should the need for replacement parts arise, please contact Larson Electronics.
