TLR-10-SKI

10' Single Ski Axle Trailer - Mount Light Masts, Cameras, and Equipment

Product ID: 104835

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

Made in the USA

The Larson Electronics TLR-10-SKI ski trailer provides a safe and effective way for operators to quickly deploy light light masts other equipment. The user provided equipment mounts onto a 10` single axle trailer with skis, allowing operators to transport from location to location over ice and snow.

PLEASE NOTE: ANY FREE SHIPPING OFFERS DO NOT APPLY TO TRAILERS

The TLR-10-SKI is a 10` by 6`, single axle trailer with skis instead of wheels. The trailer bed is constructed of expanded metal to help prevent ice buildup on the bed platform, allowing snow and rain to flow through the trailer instead of building up on the deck, and to aid in melting of any ice and snow to buildup on the bed. The dual ski trailer is equipped with 3,500 lbs leaf springs and metal snow skis. The trailer can support and haul an additional 1,000 lbs of equipment. A 2" round and 5/8" thick Pintle hitch is welded to the trailer, two standard safety chains, and skis allow for easy hookup and towing via snowmobiles and four-wheelers. *Please note, this trailer is not equipped with running, stop, tail, or signal lights and is designed of off-road use only!*

The Four 1,000 lbs hand crank leveling jacks are used for leveling. The jacks can be leveled by hand crank or attachment provided for power drills. These outriggers can be extended 2` out from the side of the trailer for added stability.

Three additional 1,000lb jacks help prevent the skis and tongue from freezing to glaciers, or to help break the trailer and skis free after already frozen.

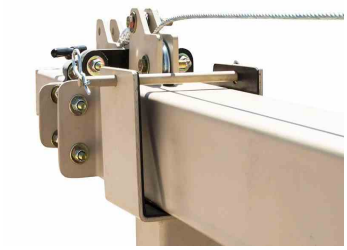

Retractable outriggers with 1,000 lb manual crank jacks

We offer a choice of light masts with either the manual or electric winches, finishing, and equipped light heads. Winch options include 1,000 lbs hand winches (included standard) or optional electric winches for standard light towers, and heavy duty winches and hoists for high payload units. Powder coating color can be customized (the standard mast is gloss blue). These towers can be fitted with Larson Electronics line of high output light heads, or customize the mast head to meet the mounting requirements for your equipment.

Suggested Applications: Temporary lighting, construction sites, and security camera deployment.
