

14' Single Axle Trailer - 14' x 8.35' Bed - Jib Hoist Equipped - Holds and Transports 3 Light Towers

Part #: WAT-14x6-3XLM-JIB

**Made in Texas**

The Larson Electronics WAT-14x6-3XLM-JIB is a 14' single axle trailer designed for the transportation and deployment of light towers. This light tower trailer gives operators a safe and easy way to load, deploy, and transport light towers between various work sites and locations. A jib on the mast allows operators to load up to three light towers onto the bed of the 14' single axle trailer and secure those towers down for transportation. The towers can then be easily redeployed at the next work site or location.

Trailer: Durable, painted steel construction makes the trailer sturdy during use. The 14' long single axle light tower trailer can securely hold up to three light towers for transportation between job sites and other locations where illumination is needed. The trailer features an adjustable ball hitch that provides secure hookup to tow vehicles. The trailer is finished in industrial grade paint for protection against rust and corrosion and provides an attractive finish. The trailer is equipped with stop/tail/turn lights, side markers, and license plate light for meet with FMVSS and DOT regulations.

Trailer Jib: This light tower trailer from Larson Electronics comes equipped with a jib that allows operators to hoist light towers from their anchor point onto the 14' trailer. Once they are on the trailer, the operator can then securely fasten the light towers to the floor of the single axle trailer via their mounting plates. This process can be repeated for up to three light towers. Once all the light towers requiring transportation are secured, the trailer can then be towed to the new location or job site. This process is reversed once at the new location to redeploy the lights. The operator would release the mast from the trailer, hoist the mast off, and remount the mast to an appropriate anchor point.

At Larson Electronics™, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973.
