HML-5M-BC

HML-5M-BC 24 Volt Military Spotlight with Magnetic Base - Battery Clamp Connection

Product ID: 108

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

HML-5M-BC Military Spotlight

Lamp Type: 70 Watt Incandescent
Dimensions: 3.25" Light Head, 7" Handle
Lamp Weight: 1.5 lbs
Voltage: 24
Wiring: 21` Cord with battery spring clamps
Lighting Configuration: Spot
Mounting: 100 lb Magnetic Mount

Features

100% Portable
Waterproof / Shock Resistant

Made in the USA

The Larson Electronics HML-5M-BC is a high powered 10 million candle power military spotlight that operates on 24V. It is 3.25 inches in diameter and has a 100 pound grip magnetic base. It has a seven inch steel powder coated handle with a solid polypropylene handle. A tension hinge enables the lamp housing to move 140 degrees.

This hand operated magnetic spotlight is effective for semi-permanent mounting and handheld use. The 100 pound grip magnetic base holds the light in place on protective barriers and gun turrets on the military HUMVEE, even under the most aggressive road and off-road conditions.
The HML-5M-BC has a 21 foot cord with battery spring clamps for direct battery connection - Connects via 2-pin molded SAE connector. A simple on/off toggle switch is conviently located within reach of the solid polypropylene handle. This light is also water, sand and UV resistant.
Note On Voltage: Most vehicles are 12 Volts DC. 24 Volts ***DOES NOT*** mean more power. Running a 24V light from a 12V power source will result in a very dim or non-functioning light, and may cause internal damage to the light as well. For common vehicle use, please order 12V.
