

HUL-xx-SP1154-BC

Bar Clamp Boat Mount for HUL Series Handheld Spotlights

Product ID: 146705

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

The HUL-xx-SP1154-BC from Larson Electronics is a Bar Clamp Boat Mount for HUL Series Handheld Spotlights. This bar clamp boat mount system includes two bar clamp mounts that allow for simple and easy attachment to round poles. Each bar clamp mount is machined from aluminum and either clear or black anodized for protection from oxidization. These mounts are lightweight, non-intrusive and durable.

Please Note: HUL series handheld spotlight shown in pictures not included. Bar clamp boat mount only.

The included bar clamps are not adjustable. Instead you select the size that matches the installation tube stock. The top portion of the mount has a through hole that enables the operator in pass one of two 1/4-20 bolts through it and secure that stud with a Nylock nut. The Nylock nut and bolt are provided. Small machine screws secure the bottom half of the clamp to the top portion. The installer simply affixes the light to the top portion and places the assembly on the rail or bar. The bottom portion is positioned and secure with the machine screws, cinching the clamp tightly to the bar. An additional set screw at the very bottom of the mount adds additional security for bars that are slightly off size (metric outer diameters).
