

EXP-LED-F4W-FFHL

4W Explosion Proof LED Helmet Mount Flashlight - Hands Free Light - 100 Lumens - IP67

Waterproof

Product ID: 146721

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

EXP-LED-F4W-FFHL Intrinsically Safe LED Helmet Light

Lamp Type: LED

Case Dimensions: 7.125"L x 1.75"W x 2"H

Weight: 7 Ounces

Battery Type: (3) AA Batteries

Battery Runtime: 26 Hours

Total Watts: 4

Lumens: 100

Candela: 7,500

Lux @ Lens: 145,400

Lux @ 10': 599

Lamp Life: 30,000+ Hours

Color Temp: 4500K

Lighting Configuration: Single Beam

Ambient Operating Temp: -20°C to +40°C

Operating Temp Rating: T3

Housing Material: Polypropylene Nylon

Housing Color: Black, Green or Orange

Lens Material: Polycarbonate

Mounting: Helmet Mounted

Ratings/Approvals:

UL 913 CSA C22.2

Class I Divisions 1 & 2 Groups A, B, C, D

Class II Division 1 Groups E, F, G

Class II Division 2 Groups F, G

Class III

Made in the USA

The EXP-LED-F4W-FFHL from Larson Electronics is an Intrinsically Safe LED Firefighter Helmet Mounted Flashlight that is designed to handle the

demands of working within hazardous locations and environments where potentially explosive vapors, gases and other volatile compounds may be encountered as well as to easily mount to firefighter helmets and hard hats for hands free operation. The non-slip engineered polypropylene nylon case on this intrinsically safe LED flashlight is superior to standard aluminum or steel flashlights due to the fact that it will not become slippery or lose grip even when operators have greasy or oily hands or encounter other environmental factors such as smoke, chemicals, dust and ash. This ergonomic and tactical intrinsically safe LED flashlight features a knurled design to offer operators a superior gripping surface for maximum control of the approximately 560 foot long beam of light this flashlight is capable of projecting.

The EXP-LED-F4W-FFHL is specifically designed for first responders and firefighters to have a reliable light that can stand up to anything an emergency or other situation can throw at it including smoke, ash, dust, potentially explosive environments, chemicals and other substances that could cause inferior lights to stop working correctly. Lighting reliability is very important to first responders and firefighters alike and the hands free operation offered by this helmet mounted light along with the extreme durability make for the ideal lighting solution. This intrinsically safe LED flashlight produces a powerful 100 lumen light beam that can illuminate objects up to 560 feet away from the operator. The main beam from this compact and lightweight LED flashlight is tightly focused to produce a far reaching beam of bright white light. This LED flashlight is versatile, rugged and can serve in industrial, public and tactical applications with ease. Rated IP67 waterproof for submersion in up to one meter of water and a one meter drop rating make this intrinsically safe LED flashlight ideal for a wide range of rough use conditions and environments that may be hazardous or potentially explosive.

LED Benefits: Unlike gas burning and arc type lamps that have glass bulbs, LEDs have no filaments or fragile housings to break during operation and/or transportation. Instead of heating a small filament or using a combination of gases to produce light, light emitting diodes (LEDs) use semi-conductive materials that illuminate when electric current is applied, providing instant illumination with no warm up or cool down time before re-striking. Because there is no warm up period, this light can be cycled on and off with no reduction in lamp life. LED lights run at significantly cooler temperatures than traditional metal halide and high pressure sodium lights and contain no harmful gases, vapors, or mercury, making them both safer and more energy efficient. No extra energy is wasted in cooling enclosed work areas due to external heat emissions from bulb type lights, and the operator risks associated with traditional lighting methods, such as accidental burns and exposure to hazardous substances contained in the glass bulbs, are eliminated. In addition, LEDs are also safer for the environment as they are 100% recyclable, which eliminates the need for costly special disposal services required with traditional gas burning and arc type lamps.

The spot beam of this LED flashlight is actuated via a push button switch for easy accessibility. The high intensity LED used in this flashlight produces 100 lumens of light each and offers a 30,000 hour lifespan. The high efficiency LED produces a 26 hour runtime on a single set of three AA batteries when operating the light beam. The housing is constructed of lightweight and chemical resistant polypropylene nylon that offers superior chemical resistance and high durability. This LED flashlight is impact and vibration resistant and is IP67 waterproof. This intrinsically safe flashlight is approved Class I, Divisions 1 & 2, Groups A, B, C, D, Class II Division 1 Groups E, F and G, Class II Division 2 Groups F and G, and Class III.

Durability: The EXP-LED-F4W-FFHL LED flashlight features a durable polypropylene nylon housing and a knurled ergonomic design that offers operators a high level of grip and gives the flashlight a high degree of durability. This flashlight is impact resistant from heights up to 1 meter and vibration resistant so that if a drop does occur the light is unlikely to withstand any damage. An IP67 waterproof ratings further adds to the durability and versatility of this intrinsically safe LED flashlight.

Mounting: The EXP-LED-F4W-FFHL attaches to the brim of firefighter helmets and other hard hats and helmets for secure and hands free operation when it is needed the most.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.

High Quality Features

1. High Intensity LED - 100 Lumens
2. Easily accessible push button
3. Single Beam Operation
4. IP67 Waterproof
5. Chemical/Impact Resistant
6. 26 hour Runtime
7. Intrinsically Safe Approval
8. Knurled design for easy grip.
9. Lightweight
10. Durable polypropylene nylon Housing
11. Ideal for firefighters and other first responders who need a reliable source of hands free light.
12. Securely attaches to the brim of firefighter helmets and other hard hats and helmets.
13. Stands up to exposure to ash, dust, smoke, chemicals and other potentially damaging substances.

Superior LED Benefits

1. 30,000+ hour lifespan.
2. Can SAVE 50% or more on energy.
3. Qualifies retrofit projects for financial incentives, including utility rebates, tax credits and energy loan programs.
4. Reduces energy use and prolongs life-spans of peripheral cooling units (A/C, refrigeration)
5. 100% recyclable.
6. No toxins-lead, mercury.
7. No UV light, infrared radiation or CO2 emissions.
8. Qualifies buildings for LED and other sustainable business certifications.
9. Bright, even light maintains consistent color over time.
10. Instant on/off - No flickering, delays or buzzing.
11. Very good color rendering.
12. Vibration/impact resistant.
13. Significantly cooler operation.
14. Less frequent outages, higher output improves workplace safety.
