Please see last page for supporting documentation for this product (certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Image:

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

MMP-DBSCM Suction Cup Mount w/ Magnetic Plate
Type: Suction Cup Mount
Suction Cup Dimensions: 3.3" Diameter
Magnetic Plate Dimensions: 4.75" Square
Weight: 3.21 lbs
Weight Capacity: ~10 lbs
Mount Materials: Marine Grade Aluminum
Magnetic Plate Materials: Steel
Finish: Powder Coated

Features
Triple Suction Cup Design
Can Support Approximately 10 Pounds
Powder Coated for Durability
1.5" Rubber Ball and Socket System

Made in the USA

The MMP-DBSCM from Larson Electronics is a Suction Cup Mount with Magnetic Plate that allows operators to attach the mount to surfaces such as glass, plastic, aluminum and stainless steel work surfaces. Once the suction cup mount is mounted securely to the desired surface, operators can then attach magnetic mount equipment such as strobe lights and cameras. This suction cup mount with magnetic plate offers versatility and mounting ability where other mounting systems might fail or simply not work.

The MMP-DBSCM consists of three 3.3" suction cups on a locking base and a short length

double socket arm. The triple suction cup design offers secure mounting ability on plastic and other non-porous surfaces. This suction cup mount with magnetic plate also features a 1.5" rubber ball and socket system with adjustment points on both sides of the socket arm. This means that equipment attached to the magnetic plate on the front of this suction cup mount can be adjusted to the ideal angle or position required. The MMP-DBSCM has a weight capacity of approximately 10 pounds.

The MMP-DBSCM suction cup mount from Larson Electronics is constructed from high strength composite marine grade aluminum that is powder coated for durability and resistance to corrosion. The magnetic mounting plate on the front of this suction cup mount is built from steel and is also powder coated for durability. The magnetic plate measures 4.75" square to accomodate a wide variety of magnetic lighting and other equipment.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
