

SMP-RG-2XCP

Perko Mount - Red/Green Running Lights - (2) Waterproof Cigarette Plug Sockets - 10A Max Load

Product ID: 147323

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

SMP-RG-2XCP Perko Mount

Unit Type: Perko Mount

Dimensions: Pole Length Varies - 3/4" Diameter

Weight: 3 lbs

Voltage: 12V DC

Amps: 10A (Max)

Light Color: Red and Green

Pole Material: Anodized Aluminum

Power Connection: (2) Waterproof Cigarette Plug Sockets

Pole Length: 6", 12", 24" or 48"

The Larson Electronics SMP-RG-2XCP Perko Mount is designed for mounting lights and other compatible equipment on boats/vessels in marine environments. This unique mounting system features red and green running lights that can be seen from far distances. For powering equipment, the device comes with two waterproof cigarette plug sockets under the running lights.

Note: Max amperage for any units plugged into the device is a combination of 10 amps.

The SMP-RG-2XCP is a perko mount system for marine applications. The device

supports bright red and green running lights for notification on boats/vessels. Two waterproof cigarette plug sockets mounted under the running lights are available for powering low voltage equipment. This unit is capable of powering 12V DC equipment at a maximum load of 10 amps. An example of this setup could be 2 amps on one side and 8 amps on the other or one 10-amp unit. The SMP-RG-2XCP is constructed of anodized aluminum and comes with a locking collar for securing different positions on the pole.

Our most popular pole lengths are 12" and 24". When in use, roughly 2 1/4" of the pole is going into the recessed socket and the running lights are mounted to a plate, which drops the running lights down past the top of the pole at 1-1/2". As a result, while the total pole length may be 6", the running lights may only be 3-3/4" from the top of the boat deck surface (for example).

Applications: Hunting, security, boating, law enforcement and emergency services; suitable for vehicles, boats and other outdoor/marine applications.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
