

**LED Blue Strobe Light - 18 LEDS - Battery Powered - Bracket Mount - Continuous or Strobe Output**  
**SL-BM-B**

**SL-BM-B LED Strobing Beacon**

**Lamp Type:** LED

**Dimensions:** 6" Wide 1.5" Height

**Lamp Weight:** 1 lbs

**Voltage:** N/A 4 AA Batteries

**Wiring:** None- Battery Powered

**Lighting Configuration:** Strobing Flash/Constant On

**Candela:** 200

**Flood Beam:** 180°

**Spot Combo:** 35°

**Mounting:** Bolt-on/Bracket Mount

**Features**

100% Portable

Waterproof / Shock Resistant

Battery Powered

Constant on or Strobe Operation

Compact

1 year warranty replacement on this LED light (or LED bulbs for light fixtures with removable LED bulbs). After 30 days, the customer ships the failed LED light and/or LED bulb to Larson Electronics at their expense. If the failure is a manufacturer defect, we will ship a new replacement to the customer. If failure occurs within 30 days of receipt, Larson Electronics will provide a return label via email to the customer. When the failed light is returned, we will ship a new replacement.

**Made in the USA**

**The Larson Electronics SL-BM-B Bolt-on Surface/Bracket Mount Beacon is battery powered and provides up to 120 hours of operation on a single set of 4 AA batteries. This LED Beacon is 100% portable, has a bolt-on/bracket mount base, and provides a highly effective alternative to beacons that require wiring and special permanent mounting.**

This compact LED beacon contains an 18 LED lamp assembly that produces a brilliant signal visible for extended distances. This LED beacon is blue in color and is 100% portable, with a bracket mount that provides much more stability during high-vibrations than that of magnetic mount bases. This mounting system is also ideal for non-ferrous surfaces, such as aluminum and stainless steel, where a magnet mount is unable to grip and will fall off. This combined with the LED beacons battery operation enables it to be easily transported and operated wherever a powerful beacon is needed. With no need for wiring or external power sources, this light is ideal for applications where a signal light is needed on an

occasional or temporary basis.

The SL-BM-A LED beacon is durably built and resistant to shocks and vibrations. The durable housing and lens is designed to provide high strength and a small size, allowing easy placement in tight spaces. This LED beacon can be operated in either a strobe or constant on mode, with operation controlled by a simple push button located on the back of the unit. Dimensions for the lamp assembly are 6 inches wide by 3 inches high, and the unit sits 1.5 inches high when mounted. This strobe flashes once per second and runs for up to 120 hours on a single set of 4 AA batteries. The durability, portability, and power of this LED beacon make it ideal for towing, forklifts, cranes, trailers, security, warehouses, and anywhere a fast and simple beacon solution with plenty of power is needed.
