Product ID: 148094

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

Perko bow mount for boat lights that has a 2 pin gold coated connector in the base. The base slides and locks into a sliding door Perko socket via a twist collar. The Perko socket can be attached to any surface including fiberglass and will securely hold the light in place.

The purpose of this assembly is two fold. Once attached to your light, the wiring is contained within the pole, keeping it dry and secure. Generally, these bow mount (Perko bow mount lights) are handy on boats because they elevate the light over the boat's side, increasing the usefulness of the light. More importantly, the operator can unlock the bottom collar and slide the light out of the socket and store it safely during the day or when the boat is docked. With the light removed, you can put on your boat cover, fish, wake board, etc. without having the light in the way.

This assembly is made to accomodate a Golight Stryker.

There are several other mounting hole patterns in the stainless steel mounting plate, including 3/8 - inch center hole mount for most High Intensity Discharge (HID) or 12 volt halogen stud mount lights, including the Larson Electronics 24 volt equipment lights, HID boat lights or just about any brand of off road halogen or HID light.

www.larsonelectronics.com now offers this pole mount lighting option in lengths of 6 inches, 12 inches and 24 inches to work within any environment.
