

4.4 kW Portable Gas Powered Generator - Electric Start - Wheel and Handle Kit

Part #: GPG-4.4KW-1P-120.240

Made in the USA

The Larson Electronics GPG-4KW-1P-120.240 is a portable, gas powered generator with a 3,300 rated watt output and 4,000 watt surge peak. It has a durable 7.0 horsepower, air cooled OHV engine and an all steel 4-gallon fuel tank, providing operators with up to 8 hours of runtime at half load. This portable generator provides operators with reliable emergency backup power in harsh conditions and outdoor work sites.

The GPG-4KW-1P-120.240 is powered by 7.0 horsepower, air cooled overhead engine with an EZ-pull recoil start that runs on gas, cranking out 3,300 watts of constant running power, and a peak of 4,000 watts. The fuel tank also includes an easily readable fuel gauge. This portable generator features a variety of receptacles, including two fully protected 120 Volt, 20 Amp, 60 Hz-NEMA 5-20R outlets and one 120 Volt, 30 Amp, 60 Hz-NEMA L5-30 twist-lock outlet.

This heavy-duty generator has many features including a 4-gallon fuel tank, which provides 8 hours of reliable power at half load, and possesses the ability to run electronic devices including lights and other essential appliances needed during power outages. This gas powered genset features low-oil shut off safeguards, which help to protect the engine from low-oil damage, while an integrated circuit breaker protects against system overload. This generator also features a spark arrester to prevent flammable debris from expelling from the generator by trapping and destroying them. This protects against potential fires that may occur during operation, allowing this unit to be used safely in outdoor areas and potentially hazardous applications such as disaster zones where remote power is needed. An automatic voltage regulator helps to produce cleaner power and keeps it EPA approved.

A heavy-duty steel frame with four-point fully isolated motor mounts houses the engine for smooth transportation, and a quiet exhaust reduces engine noise for quiet operation. This generator features an accessible, full power panel that houses the power controls including an oil warning light, the circuit breaker, the start-switch, the volt meter and the power outlets, for easy operation.

Applications: This portable generator is suitable for use in remote locations, such as temporary camps, construction sites, military bases and areas without reliable access to the grid. It can be utilized to power a wide range of heavy duty tools and equipment, including laptops, portable machines and mobile devices. The unit's robust recharging options offer flexibility in environments where access to reliable power sources are severely limited.

Specifications / Additional Information

GPG-4KW-1P-120.240 Portable Generator

Dimensions: 17.5" x 18" x 23"

Shipping Weight: 92.4 lbs

Engine: 7.0 horsepower, air cooled OVH

Rated Power: 3,300W output, 4,000W peak

Special Orders-Requirements

Quick Summary

Quiet Exhaust For Reduced Engine Noise

EPA Approved

Fuel Capacity: 4 gallons

Voltage: (2) 120 Volt, 20 Amp, 60 Hz (1) 120 Volt, 30 Amp, 60 Hz

Starting System: Recoil

Phone: 1-214-616-6180

Toll Free: 1-800-369-6671

Fax: 1-903-498-3364
