

WAL-TP.BS-500Q-120V

500W Portable Halogen Light with Adjustable Tripod - Removable Lamp Head

Product ID: 152371

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

WAL-TP.BS-500Q-120V Portable Tripod Halogen Light Tower

Light Type: Halogen

Tripod Height: Up to 40"

Weight: -

Wattage: 500W

Light Materials: Powder Coated Steel

Lens Material: Tempered Glass

Tripod Material: Steel

Light Configuration: Flood

Wiring: 6` SJTW 18/3 Cord

Mounting: Adjustable 8` Tripod w/ Removable Base Stand

Ratings/Features:

Adjustable 40" Tripod Stand

Removable Base Stand

Fully Adjustable Light Head

The WAL-TP.BS-500Q-120V from Larson Electronics is a Halogen LED Work Light Fixture with Tripod Mount that offers operators 500 watts of lighting power at heights of up to 40 inches above the work area. The halogen head on the WAL-TP.BS-500Q-120V produces white halogen flood light while the tripod provides sturdy mounting options within the work area or desired location. This tripod light tower operates on 120V and includes a six foot 18/3 SJTW cord for safe electrical connections.

The WAL-TP.BS-500Q-120V is a portable halogen light work area tripod lighting solution for operators who need bright illumination for completing their work or other tasks. The tripod stand can extend up to 40 inches off the ground, and the halogen lamp head can be removed from the stand and used with a base stand for

lower level illumination. Both the tripod tower and base stand without the tower are portable lighting options for operators to move around as needed throughout the facility. A sealed rocker switch controls the single 500 watt halogen bulb. The entire tripod is constructed of steel with a powder coat finish for additional durability. The halogen lamp includes tempered glass and a metal safety grill to protect the bulb and glass from potential damage during falls. Foam grip handles are included to allow operators to easily position the light as desired. The WAL-TP.BS-500Q-120V is an ideal lighting solution for a wide variety of work areas and tasks in general industrial environments.

LED Benefits: Unlike gas burning and arc type lamps that have glass bulbs, LEDs have no filaments or fragile housings to break during operation and/or transportation. Instead of heating a small filament or using a combination of gases to produce light, light emitting diodes (LEDs) use semi-conductive materials that illuminate when electric current is applied, providing instant illumination with no warm up or cool down time before re-striking. Because there is no warm up period, this light can be cycled on and off with no reduction in lamp life. LED lights run at significantly cooler temperatures than traditional metal halide and high pressure sodium lights and contain no harmful gases, vapors, or mercury, making them both safer and more energy efficient. No extra energy is wasted in cooling enclosed work areas due to external heat emissions from bulb type lights, and the operator risks associated with traditional lighting methods, such as accidental burns and exposure to hazardous substances contained in the glass bulbs, are eliminated. In addition, LEDs are also safer for the environment as they are 100% recyclable, which eliminates the need for costly special disposal services required with traditional gas burning and arc type lamps.

Versatility: The WAL-TP.BS-500Q-120V offers operators a large degree of versatility. In addition to the adjustability of the light heads, the aluminum tripod is also adjustable for height and can extend the light heads up to 40 inches above the work area or lighting location. The halogen light head on this work area tripod lighting solution is mounted to a removable base stand for low level illumination. Comfort grip, center-mounted handles make removal of the base stand a simple task.

Wiring/Power: The WAL-TP.BS-500Q-120V is equipped with 6 feet of SJTW 18/3 cable and operates on 120V AC voltage.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
