Transformer Features: With a transformer rating of 800kVA, the MT-PMD-3P-31500D-800KVA-400Y.231-N3R-50HZ transformer is a three phase unit with a primary voltage of 31500V Delta. It also provides a secondary voltage of 400Y/231 Wye-N. Featuring robust construction, this unit`s cores are manufactured with non-aging, cold-rolled silicon steel laminations using state of the art technology.

This 50Hz unit boasts a low cost of ownership and is highly energy efficient. Lower heat emissions mean less cooling is needed as well. The Standard Type 3R enclosure makes the unit suitable for both indoor and outdoor applications and it can be pad mounted. The unit also features Class H 220°C insulation with a 150°C temperature rise and is rated IP24.

Benefits: The MT-PMD-3P-31500D-800KVA-400Y.231-N3R-50HZ general purpose transformer offers many benefits to the consumer. Precision cut aluminum transformer winding material help to improve performance. The close tolerances used during manufacturing also eliminates burrs which hinder performance. Each core is specially coated to prevent the ingress of moisture and are electrically balanced to minimize axial forces during short circuit situations.

This 50Hz transformer provides owners with significant energy savings as well as offering environmental benefits. Higher efficiency not only extends the life of the transformer, but also turn into cost savings for owners in the form of lower energy bills and decreased cost of ownership. Integrated floor and wall mounting brackets make installation fast and easy and the offset outward facing floor installation holes allow for easy power tool access.

Applications: General purposes.

Larson Electronics is a manufacturer and as such can build stationary and portable transformer systems to your specifications.
