

XLE-EL-TS-120V-20A-MIN.30

Spring Wound Timer Switch - 30 Minute OFF - 20 Amps - 120V

Product ID: 154064

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

Made in the USA

The Larson Electronics XLE-EL-TS-120V-20A-MIN.30 is a spring wound timer switch that requires no energy to operate. This single pole, single throw switch is an energy saving timer that can replace any standard wall switch to limit the time lights, fans, motors, heaters and other equipment is ON to help reduce energy costs.

This 30-minute spring wound timer switch operates at 20 amps on 120V. This molded white dial plate is designed to fit either toggle or decorator style switch plates, both single or multi-gang.

Suggested Applications: LED and CFL lights, heaters, motors, fans and other electrical equipment in industrial environments.
