

RL-14-IR

Covert Infrared Cover for RL-14 - Snap On/Off - 850nm Cut off Blocks All Visible Light

Product ID: 1617

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

Covert Infrared Filter Cover for the RL-14 High Intensity Discharge (HID) spotlight with 3350 Lumen output. Cover can be snapped on and off. IR filter cover attaches to groove on lens protector/holder. Once attached, night vision equipment is required to see the non-visible light output.

Infrared filters block 99% of the visible light spectrum from the HID light bulbs. These filters allow a maximum of Infrared output while maintaining extreme covertness. Originally manufactured for the US Military, these filters are designed to meet stringent military standards. The polysulfone blend is known for its strength and when used with a flashlight, these filters will drastically improve the effectiveness of your night vision equipment.
