R-2 Replacement Spot Lamp for HML-2 and ML-2 spotlights

Product ID: 18

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

This sealed, all-glass 35 watt lamp provides 1050 Lux of illumination at 25 feet. The lamp is rated at 5 million candle power within a Larson Electronics. Like the entire all-glass range, this lamp was designed and built for aircraft landing lights. As a result, the lamp not only produces a bright beam, but it also is completely resistant to vibration and weather related damage. This particular lamp contains a strong filament covered by a full arc shield. The shield gathers the light from the bulb and focuses it into the reflector. The resulting beam is highly focused but at a lower intensity. Thus, this light is fairly effective in inclement weather conditions, since the beam spread and overall intensity is reduced. The combination of the filament and the shield creates a more focused beam. Although not as effective as the Blue Spot, this lamp is a reasonable alternative for inclement weather use at a lower price point. The life of this lamp is rated at 150 hours within a Larson Electronics. Replacements lamps are readily available through Larson Electronics and www.larsonelectronics.com.
