**Remote Operation:** Remote control functions include on/off button, and a toggle switch which control up, down, left and right movement. The light will continue movement as long as the toggle switch is moved in a direction. Releasing the switch stops movement and holds the Golight in position. A fast and slow mode button (turtle/hare) controls the speed of the motor while the pan and tilt function buttons are depressed. Holding the button for 12 seconds in fast mode results in a full 370 degree rotation, and 8 seconds for full tilt. Slow mode is used for pinpoint accuracy at distance and is approximately 35 seconds for full rotation and 20 seconds for one full range of tilt.

**Durability:** The GL-3020 Golight Stryker is designed for hunting and demanding outdoor use with a weather resistant housing constructed of high quality ASA Luran thermoplastic that is heat resistant, impact resistant, UV resistant and able to withstand rugged use and abusive conditions. This particular Golight Stryker has a durable white finish, making it ideal for docks and buildings where an attractive appearance is desired. Remote movement of this spotlight is provided by an automotive grade internal motor, gear, and transmission assembly that is constructed of LEXAN, brass, and stainless steel to provide rust and corrosion resistance as well as long life and reliable operation.

**Mounting:** The light is permanently mounted. The outer rubber cover of the remote can be removed so that the rear mounting plate can be attached to a mounting surface with four screws. The remote requires that a 2 inch hole be drilled in the mounting surface to accommodate the rear portion of the controller and wiring harness. The rear "shaft" of the mount, in combination with the base plate secures the remote. A 20 foot harness is included. A joystick is provided to enable the operator to move the light in all directions. An on/off button and a separate fast and slow button are positioned on the remote for ease of reach and operation.

**Power:** This light operates with 12 volts DC and draws 3 amps, making it ideal for vehicles, boats, ATVs, and similar sources of 12 volt direct current. It is equipped with a 1 foot pigtail. Operator must provide wiring (16 AWG) from battery and/or fuse box to the light. Dash mount remote connects to light via 20 foot harness (included).

**Light Output:** The lamp in this Golight Stryker is a 65 watt halogen bulb which produces 1,300 lumens. This bulb is paired with a tight focus spot beam optics to produce a spot beam 850 feet in length. This lamp has a 6000K color temperature, giving it very good color rendering and contrasting properties and the ability to clearly and sharply illuminate objects at long distances. This beam is effective to the far end of its reach, producing enough illumination to read a book at 850 feet.

This high power Golight Stryker is ideal for hunting, security, boating, law enforcement, emergency services, utilities, and anywhere high power and remote control functionality are desired. This unit produces a more powerful and far reaching beam than halogen spotlights and uses less power on a 12 volt system, making it well suited to vehicles and boats where power supply is limited.

#### **Golight Stryker Features**

1. Weather Proof Lamp and Remote Control.
2. Remote Control Programmable with More than 60,000 Possible Channels. Remotes Can be Programmed to Control One Golight or Several
3. R.F. Frequency, F.C.C., S.A.E. tested and Canada Certified.
4. Remote Control Range up to 100 Feet.
5. Automotive Grade 12 Volt D.C. High Torque Motor.
6. Weatherproof Connectors Meet OEM Vehicle Manufacturer Specifications
7. Meets Marine Standards for Fresh Water and Saltwater Use.
8. 1,300 Lumens, 850 Foot Beam Length
9. 12 Volt DC 3 amps Draw.

#### **Specifications / Additional Information**

##### **GL-3020 Golight Stryker**

**Lamp Type:** 65 Watt Halogen Bulb

**Dimensions:** 6" W x 6" Depth x 6" H

**Weight:** 5 Lbs

**Total Watts:** 65 watts

**Voltage:** 12V DC

**Lighting Configuration:** Spotlight

##### **Summary/Certifications**

65 Watt, 1,300 Lumen

Remote Control, 100' Range

Meets Marine Standards for Fresh / Saltwater Use.

UV and Weatherproof

12 VDC Operation

**Amps:** 3 Amps

**Mounting:** Permanent

**Total Lumens:** 1,300

**Lamp Color Temperature:** 6000 Kelvin

**Weather Rating:** Weatherproof

**Movement Range:** 135° Tilt - 370° Rotation

**Remote Control:** Single Wired, Dash Mount Controller

**Warranty:** 3 Years

**Special Orders- Requirements**
