

SL-M-W

LED White Strobe Light - 18 LEDS - Battery Powered - Dual Magnetic Base - Continuous & Strobe Output

Product ID: 1926

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

1SL-M-W LED Strobing Beacon

1Features

110

Made in the USA

The Larson Electronics SL-M-W Magnetic Mount Beacon is battery powered and provides up to 120 hours of operation on a single set of 4 AA batteries. This LED Beacon is 100% portable, has a dual magnet mount base, and provides a highly effective alternative to beacons that require wiring and special permanent mounting.

This compact LED beacon contains an 18 LED lamp assembly that produces a brilliant signal visible for extended distances. This LED beacon is white in color with a clear lens and is 100% portable, with a two magnet mount and battery operation that allows it to be operated wherever a powerful beacon is needed. The magnetic base includes two 2.5 in diameter magnets with 70 lbs of grip each that provide a secure mounting platform on any ferrous metallic surface. With no need for wiring or external power sources, this light is ideal for applications where a signal light is needed on an occasional or temporary basis.

The SL-M-W LED beacon is durably built and resistant to shocks and vibrations. The durable housing and lens is designed to provide high strength and a small size, allowing easy placement in tight spaces. This LED beacon can be operated in either a strobe or constant on mode, with operation controlled by a simple push button located on the back of the unit. Dimensions for the lamp assembly are 6 inches wide by 3 inches high, and the unit sits 1.5 inches high when mounted. This strobe flashes once per second and runs for up to 120 hours on a single set of 4 AA batteries. The durability, portability, and power of this LED beacon make it ideal for towing, forklifts, cranes, trailers, security, warehouses, and anywhere a fast and simple beacon solution with plenty of power is needed.
