

EPL-WBC-18C

Explosion Proof Tank Light Single Wheel Cart - For Explosion Proof Tank Lights

Product ID: 223733

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

Made in the USA

The EPL-WBC-18C from Larson Electronics is a Single Wheel Light Cart that is considered a universal tank light cart due to its ability to be disassembled and passed through tank openings and reassembled once inside. This single wheel cart keeps electrical connections made to customer provided lights 18" above the ground.

The EPL-WBC-2X4 portable cart light is an aluminum light cart with a solid rubber wheel and creates the ability to manage multiple lighting options on an easily deployed portable platform.

This cart assembly is constructed of aluminum with stainless steel fasteners and has a single solid rubber wheel and two integral handles, allowing this unit to be easily relocated around the work area as needed. The design of the cart keeps electrical connections 18" above the ground. The cart and lamp assembly are two pieces and designed to be easily disassembled without tools. The desired lamp

fixtures are attached to the a mounting bar which can be loosened and removed without tools. Once disassembled, the cart and lamp assembly can be passed through most standard sized man-holes and reassembled once inside. The multi-purpose, portable design of this light cart makes it a popular choice for industrial applications and is designed to support the lamp head assembly from the following series, HAL-1X400, HAL-2X400 and EPL-TP. Larson Electronics can configure this unit with a wide variety of lighting and equipment options. Please contact us using the information below if you have any special design or configuration needs.
